Battswap Inc.

Radek Janků

www.battswap.com

radek.janku@battswap.com

Battswap is unique technology for battery swap in electric cars. Come&Go process takes just 30 seconds.

Battswap Inc. represents a complex technology solution for battery swap in electric cars. It provides fast and cheap solution for the biggest EV pain – short range and long charging time. The company wants to offer licensed know-how to various car producers, who will get a competitive product – electric vehicle with swap option. Other activity relates to swap station network and service providing. The project is currently in stage of prototype launching. Our target by is 50K EV cars equipped with Battswap system by 2018.

Briskat

Vladimir Makovsky

www.briskat.com

vlad@briskat.com

Briskat develop analytic database suitable for websites with high traffic. Our motto is "Everyone can explore the data".

We develop analytic database suitable for business intelligence vendors, BI solution providers but also for high trafficked websites for interactive analytics. Our database is on average 10x times faster than other OLAP databases. At the same time, we can serve many more concurrent users. Our architecture allows to share many different customers into a single analytical platform. This reduces operation cost as well as the unit cost per customer.

FreshFlow Systems

Jan Rosa

<http://www.freshflow.io>

jan.rosa@freshflow.cz

info@freshflow.cz

FRESHFLOW - THE CALENDAR THAT GIVES YOUR TEAM MUCH MORE. FRESHFLOW IS BASED ON SUPERCHARGED CALENDAR CONNECTED WITH BUILT-IN CRM.

We provide FreshFlow as the SaaS project. FreshFlow is the calendar that gives the teams much more. It is based on supercharged calendar connected with built-in CRM. FreshFlow is ideal for managing sales teams (mlm, insurance companies, etc). Currently we serve more than 2000 users with almost 1200 of them being paying customers. We provide this service to financial advisors of Partners a.s. under the white label Partners Office. Recently we have launched new application update that enables small and medium teams to utilize the benefits of FreshFlow.

Jobote

Tomáš Horáček

www.jobote.com

tomas@jobote.com

Jobote is HR service that helps companies like to hire the best talents using social networks and recommendation of their employees. We can save up to 70% of recruitment costs compare to a personal agencies and time to half.

Jobote is an online HR service that aims to simplify and accelerate the whole process of hiring new employees. Your employee should be able to affect which candidates will be hired on the positions of their colleagues. Therefore, we have developed and have been constantly improving a service that streamlines recruitment process through online referrals and use of social networking sites (such as Facebook, Twitter, LinkedIn, etc.). Jobote is distinguished by an optimal combination of human resources management and current information technologies.

Netspot

Tea Mrozková

www.netspot.cz

tea@netspot.cz

Netspot is a platform allowing WiFi monetization using hotspot management system.

Netspot device (plug and play router with modified firmware) can be easily integrated into existing WiFi network or create a new one. Publishers display third-party ads on their customers' mobile phones screens immediately after their connection to free Wi-Fi via Netspot. Netspot provides new advertising space for Advertisers and revenue for Publishers.

Oscar Tech

Tomáš Posker

www.oscarsenior.com

tomas@oscarsenior.com

Oscar, a remotely managed tablet app, provides easy communication among seniors and family. Son/daughter can care and control via smartphone.

Oscar is a communication tablet app for seniors with remote control for help to the senior. Oscar provides a simple unbreakable interface for seniors with chosen communication capabilities: text, video, voice, pictures, reminders. This allows to a senior a seamless contact with his/her junior/daughter/son. Junior can help remotely control senior's app, thus avoiding senior's frustration with technology.

Portadi

Dusan Vitek

www.portadi.com

dusan@portadi.com

Portadi helps workplace teams manage, control and monitor access to cloud apps.

Portadi gives team managers control over access rights to cloud apps and gives them a clear answer on who in their team has access to which cloud application or website. Portadi shows team managers how apps and subscriptions are utilized, allowing them to make informed decisions about cloud purchases. Portadi provides a personalized access panel to users, which eliminates the need to disclose passwords. Portadi is part of the Microsoft Ventures Accelerator in Berlin.

PhoneX Security

Lenka Kačmaříková

www.phone-x.net

info@phone-x.net

PhoneX Security is a provider of PhoneX mobile application which enables you to make phone calls, send messages and data files securely without risk of interception.

PhoneX Security is an ICT security company headquartered in Brno (South Moravian Innovation Centre – JIC), the Czech Republic, providing scalable system for encrypted mobile communication (voice calls, sending messages and data files) which enables companies regardless of their size to communicate worldwide securely without the risk of wiretapping.

Resperanto Group

Jiří Živnůstka

www.resperanto.com

jiri.zivnustka@resperanto.com

Resperanto is designed, developed and operated by the Resperanto Group startup based in the Czech Republic and provides the service to the clients across the whole world.

Resperanto is an interactive gateway to hospitality services combining modern technologies and conventional approach. It allows instant ordering right on the spot in restaurants, bars, cafes, clubs or hotels using guests' smartphones.

The Resperanto is a supplementary service extending existing approaches in hospitality, entertainment and accommodation industry.

Storyous

Jana šrámková

<https://www.storyous.com/cz/>

jana@storyous.com

Storyous is revolutionary cloud POS system for restaurants and cafes that interacts with Storyous mobile app and social network.

Storyous vision is simple - we connect restaurants with their customers. On one hand, storyous mobile app users can get inspired and choose from selection of the greatest places in their city, share their stories and rate the places visited. On the other hand, business owners manage their sales and inventory, get feedback and even accept mobile payments from their customers.

SwiftShield.com

Jaroslav Zapadlo

<http://www.swiftshield.com>

jarda@swiftshield.com

Takes care of loved ones. Wirelessly, remotely, privately, we predict the state of being of a person, living alone.

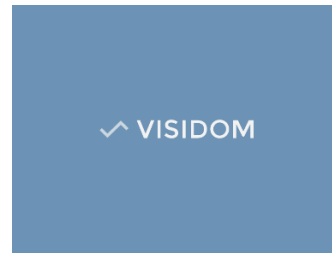

We in SwiftShield focus on bringing together wireless sensors, telemedicine and mobile devices to privately analyze and predict user's behavior at home and trigger the emergency on in case of real need; whether the need is actual or is about to happen in near future. Company focuses on senior care and product bundle, after 18 months of testing, is currently near production.

Visidom

Michal Repetný

www.visidom.com

repetny@visidom.com

Visidom is a cloud web analytics tool that shows website owners and digital agencies how a visitor exactly feels when using their site just as if they were looking over his shoulder.

We help website owners and digital agencies convert more visitors into customers – increasing the conversion rate. We record mouse cursor movement, clicks, keystrokes and scrolls. Visidom then shows you what exactly each visitor saw, what did they focus on, what was their issue and why then end up not buying.

Zeitgeist Health SE

David Dostal

www.fetview.com

info@dostal.ch

FetView is a web application for Female and Fetal Healthcare with the possibility to share the data with patients and other physicians.

The ultrasound machine of the physician is connected via our FetView-Router, which creates a VPN connection, to the online account of the physician. All measurements and ultrasound pictures are transferred automatically.
