Charles University

www.biomedic-plzen.cz

Interactions between human cells (osteoblastic cell line, primary fibroblasts, mesenchymal stem cells, etc.) and surfaces or nanoparticles from biocompatible materials with controlled properties.

Nanoprogress

www.nanoprogress.eu

R&D of nanofiber structures and applications to industry and medicine. Leading Czech cluster & member of the European excellent clusters category. Unique AC electrospinning technology.

Pardam

www.pardam.cz

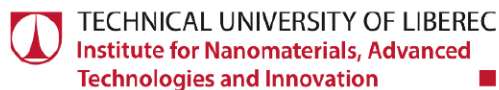

Production and development of high-quality organic and ceramic nanofibrous materials for various applications. Centrifugal Spinning industrial production technology.

Contipro

www.contipro.com

One of the world's leading manufacturers of hyaluronic acid and applications thereof. R&D and biotechnological production of active ingredients for the cosmetics and pharma industries for over 25 years.

Institute for Nanomaterials, Advanced Technologies and Innovation

cxi.tul.cz

Industrial research activities in machinery and vehicles, mechatronics, robotics, management and utilisation of artificial intelligence, nanomaterial creation, and electrostatic spinning.

nanoSPACE

www.nanospace.cz

First company in the world to produce nanofiber barrier bedding covers and anti-dust mite toys. Leading manufacturer of anti-allergic protective coatings for bedding; new pureSPACE solution.

Czech Nanotechnology Industries Association

www.nanoasociace.cz

Body to promote and internationalize Czech nanotechnology. Members from various fields of nanotechnology business – nanofibers, clean technology, energy storage etc.

Nanovia

www.nanovia.cz

Largest capacity for industrial production of nanofiber materials in Europe. Manufacturing of barrier fabrics Nanovia AntiAllergy, Nanovia Face mask and filter materials Nanovia Clean Air.
