Dendera a.s.

Contact Person: Žaneta Beníšková
Phone: +420 513 035 935
E-mail: beniskova@dendera.cz
www.dendera.cz

Dendera a.s. is specialized in production of metal sheets (by laser cutting, bending..) and weldments, including CNC-machining and surface treatment (for example: zinc coating, galvanized, powder coating, komaxit). Our company has 48 employees and our annual turnover is 3 mil. EUR. 65% of our production is exported. Every year we produce 50.000 types of products out of which is about 1/3 repeated production.

Our long experience will help you to reduce the price of needed components and keep the same or even higher quality of final products. Our company holds the certificate ISO9001. Among our current long-term customers belong e.g. VMI Holland b.v., Epe (the Netherlands), DISA Industries A/S, Taastrup (Denmark), Wagner Maschinen- und Vorrichtungsbau GmbH (Germany).

Ferram Strojirna, s.r.o.

Contact person: Josef Fluger
Mobile: + 420 728 405 931
E-mail: josef.fluger@ferram.cz
www.ferramstrojirna.cz

Ferram Strojirna s.r.o. has been in engineering business for the past 25 years. We are an established and popular company with an excellent track record, known for the best customer satisfaction in companies that work in mining, oil&gas, renewable, engineering, recycling industry industries.

We are offering weldment production, machining (planning, turning, boring, milling, CNC machining, assembly), production of special components and steel constructions. We are able to deliver a complete unit including hydraulics, electricity system with assembly, installation and testing. We also offer welded frames of machines, chassis according to the customer's documentation, welding of steel constructions by the MIG, MAG, TIG methods. We are specialized in carbon and stainless steel. We also manufacturing transportation devices such as lifts, conveyers, loaders, cranes, bearers, parts of boats, transport platforms, wagons, excavators, truck bodies, loaders, etc. The last part of our production is steel constructions - mine supports, silos, reservoirs, containers, welded constructions, construction and technological units. Construction engineering.

ITB Engineering & Production s.r.o.

Contact Person: Václav Karas
Mobile: +420 608 237 471
E-mail: karas@itb-ep.cz
www.itb-ep.cz

ITB Engineering & Production is specialized in the gastronomy area. We produce stainless steel trolleys for canteens, hotels, and restaurants. These carts are designed for both domestic and foreign markets. In addition to standardized products, we also offer production according to specific requirements.

Besides the gastronomy area, we produce precise constructions, frames, and other welded components. In cooperation with our partners, we provide laser burning into sheets and profiles, die cutting, bending and other metal processing technologies. We have a portal crane with a load capacity of 5000 kg for large structures. We also have a cargo ramp available for rail transport of large structures.

We focus on the research and development of new technologies and products, in close cooperation with Institute of Technology and Business in České Budějovice. Significant expansion of our company has occurred with the arrival of stainless steel products for major professional companies supplying the goods to Scandinavian market in the gastronomy field.

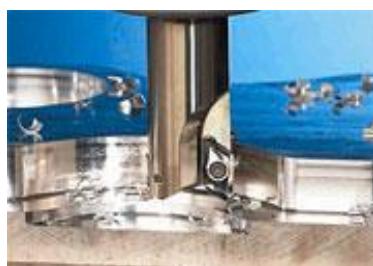

KOVO Koudelka s.r.o.

Contact Person: Jan Koudelka
Mobile: +420608270371
E-mail: info@kovo-vyroba.cz
www.kovo-vyroba.cz

With over 10 years of experience, KOVO Koudelka provides CNC machining parts (milling, turning and EDM cutting technology). Currently we have 16 CNC milling, 4 CNC turning and 1 EDM cutting machines. Company has 24 reliable employees with machining in 2 shifts, and our total capacity is ca. 7000 hours per month. A typical production batch size is between 10 – 1000 pieces, small and middle serie production. Typical materials are steel, stainless steel, aluminium, plastics. We are able to supply parts including thermal and surface treatments. The company holds certifications ISO 9001 and ISO 14001. About 90% of the parts are exported for EU and Switzerland. Our customers range from rubber and tire industries, packaging machines, energy, railway or automotive industry, food industry, medical and many others.

Otavské strojírný, a.s.

OTAVSKÉ STROJÍRNY a.s.

Otavské strojírný a.s. is well established company in business serving a wide and diverse customer base and performed subcontracting work for train manufacturers, metal construction and power generation companies, automated warehouse facilities, chemicals as well as for general contractors. Our core business is the production of custom structures in steel with a comprehensive service covering everything from technical documentation data sheets and drawings through the production to final quality inspection with logistics solution. We have up-to-date certificates for all relevant quality standards as well as special welding standards authorizing it to perform work on rail vehicles and load bearing steel structures. With 220 employees we generated in last few years average annual sale more than 18Mio€ – the lion's share in projects abroad. For following years we plan economic growth up to 20Mio€.

Slévárny Třinec, a.s

Contact Person: Šárka Wojnarová
Phone: +420 558 532 481
E-mail: sarka.wojnarova@trz.cz
www.slevarny.trz.cz

Slévárny Třinec a.s. is offering a complete foundry range. The company produces hand and machine moulding castings from carbon, medium-alloy and high-alloy steels of the weight 5kg-20 000kg, hand and machine moulding castings from hematite iron, grey and nodular cast iron from 5 kg to 50tons, metallurgical rolls up to 30tons and hand moulding castings from Cu-, Al-alloys. We also work according to standard customer's needs. We hold certificates: ISO 9001, ISO 14001, BUREAU VERITAS and others. We support pattern making, heat treatment, machining, surface treatment incl. painting and also despatch to our customers.

The product portfolio of Slévárny Třinec, a.s. consists of: castings (machine tools, agricultural machines, castings for the automotive industry, casting counterweights for handling machinery and equipment, foundry and forging ingots, rolls for various rolling mills, spare parts for metallurgical aggregates, coolers and tuyeres for blast furnaces, abrasion-resistant parts for stone and coal treatment machines, components and accessories for construction equipment (plates, dipper teeth), bearing plates and railway crossings, stamping dies for press tools in the automotive industry, Cu, Al-alloys castings, castings according to customer specifications...

CZECHTRADE Scandinavia

Contact Person: Vítězslav Blažek
