AMSP ČR - Association of Small and Medium-sized Enterprises and Crafts of the Czech Republic

AMSP ČR (NNO) provides an open, apolitical platform for small and medium-sized enterprises, self-employed persons and their organisations across the Czech Republic. The Association provides 260.000 members with information regarding subsidy offers, banking products, education, support of export, research and innovation, European Union, statistics, legislation etc. It comments on proposals of the government, ministries, or other authorities.

AMSP ČR has therefore decided to build the first private incubator for our businesses in Bangalore. This follows on the successful MeoHub project, which we put together two years ago with Meopta for our companies in New York (in the present in Florida). The Czech business incubator in India was launched on the occasion of the Czech business mission to India, which AMSP ČR organised in 2017 and where representatives of companies negotiated a number of orders with Indian partners.

The new project - Czech Industrial Cluster (CIC) is located in Jalahalli, right next to Peenya, which is the largest production hub in South Asia. AMSP ČR has organised the project with the support of an Indian partner, Pushpak, CzechTrade, Ministry of Industry and Trade of the

Czech Republic, CzechInvest, Czech Development Agency, Technology Agency of the Czech Republic, Ministry of Foreign Affairs of the Czech Republic, Tým Česko (The Czech team), Indian Institute of Management Bangalore, Dayananda Sagar Institutions, Government of Karnataka, National Small Industries Corporation, Peenya Industries Association, University of Economics Prague, Technical University of Liberec, University of Finance and Administration and the Czech company LIKO-S.

BEZNOSKA, s.r.o.

Business Line: Orthopaedic implants and instruments.

Profile: BEZNOSKA is a classical Czech family company that has been operating without a single share of foreign capital for all of the 40 years of its existence. During these past 40 years we have been successfully fulfilling requirements in the field of world orthopaedics. Nowadays BEZNOSKA has high quality products, that compete with world finest. BEZNOSKA is also dedicating huge amount of its time and resources for research and development of new range of products. However the main goal of company is still bringing joy of movement back into people's lives.

CUSTOMIZED IMPLANTS - A separate line of our production is targeted to custom-made replacements. This is a highly specialized area of activity requiring application of CT/MRI. The implants thus made are designated for patients with extreme damage (congenital, tumorous etc.) of a joint, where customized implants are the only chance how to solve the patient's problem. The whole procedure - from preparation through manufacture to surgery performance itself - is realized in a tight collaboration with designers and attending physicians.

Seeking for cooperation: We look for distributors or agents, joint-venture partners, production co-operation.

ČEB - Czech Export Bank

Business Line: Export finance.

Profile: ČEB focuses on financial services related to exports. ČEB has many years of experience in financing major export transactions of Czech exporters, as well as financing export contracts for smaller units or partial deliveries. Currently, it is foreign buyers - Czech exporters' partners - to whom most ČEB's products are being disbursed, and for whom Czech goods and services are becoming attractive, not only due to their quality and reasonable prices. All ČEB's activities are in full compliance with the rules of WTO (World Trade Organisation), the relevant recommendations of OECD (Organisation for Economic Cooperation and Development) and EU directives.

Seeking for cooperation: We are looking for projects related to export of Czech companies to India.

Czech Brewmaster, s. r. o.

Business Line: Brewery equipment, brewery raw material, brewmaster outsourcing, and consulting for breweries and malting houses.

Profile: We have been providing technology consulting services for large and medium-sized breweries and, recently, for minibreweries, as well. Our brewers have worked in over fifty breweries. Since 2007, we have been setting up breweries; small ones ourselves, larger ones in cooperation with our partners. Czech Brewmasters cooperate with other companies and specialists in the brewing industry and related fields (equipment manufacturers, raw material suppliers, hotel/restaurant/catering and gastronomy specialists), therefore, we are capable of responding to any of our clients' requirements. We have expanded to meet our customers' needs, such as sourcing malt, hops, used equipment and remanufactured kegs. We have also trained our customers' brewmasters at minibreweries.

We are brewmasters and operate our own breweries. That is our advantage. We have experience with difficulties that our clients encounter, and we know how to eliminate them.

Cooperation: We are seeking to cooperate with customers, distributors or agents. We offer brewery equipment, brewery raw material, brewmaster outsourcing, and consulting for breweries and malting houses.

LIKO-S, a.s.

Business Line: Building construction, welding and machining of stainless steel.

Profile: LIKO-S is a family owned and operated company founded in 1992. It is divided into 3 independent business divisions. Division Interiors has in the past installed over 200 000 square meters of interior glass partitions and mobile walls. The metal production division produces demanding welded and machined parts from stainless steel for various industries. Our third division Energy deals with construction of environment-friendly office, warehouse and production buildings. LIKO-S operates in Slovakia, Hungary and India via our own branches and we have extensive export activities in most parts of Europe. We have also delivered projects to USA, MENA region, or Kazakhstan.

Seeking for cooperation: with dealers and partners to offer our glass partition and mobile wall systems– fit-out companies, installation companies, architects, interior designer, construction companies, as well as with welding companies able to work on demanding projects with stainless steel.

Czech Industrial Cluster (CIC): LIKO-S promotes establishing of the CIC, which is an independent building concentrating multiple Czech companies at one place. The companies are leasing manufacturing, storage and office areas as per their needs. We are searching for an Indian real-estate developer who would become a partner in this project.

Retailys.com, s.r.o.

Business Line: E-commerce, consultancy, EU – ASIA business expansion.

Profile: Retailys.com® is the first Czech e-commerce solution from the new generation of e-commerce omnichannel systems. Our clients can administrate almost unlimited number of different e-shops and websites in various languages, currencies and fitting to local specifics, from one administration environment. Cross-border sale using multiple online sales channels is inevitable and logical step for Czech e-commerce retailers in order to increase their sales. We try to teach them how to profit from advantages of omnichannel tools and organize omnichannel sales strategies courses for our clients. With offices in London, Prague and Singapore, we focus not only on EU/USA markets, but also APAC region.

Seeking for cooperation: We look for customers, suppliers, distributors or agents as well as joint-venture partners. We would like to offer cloud omnichannel solution Retailys.com for selling products across countries and continents via advanced international e-shops, global marketplaces (such as Amazon or eBay) and social networks. Currently, we are also looking for new partnerships in Europe and Asia with e-commerce / IT / marketing agencies who are willing to help their customers expand their online businesses globally. We are also looking for contacts from Indian marketplaces and big e-commerce companies for listing products

from our costumers and, on the other hand, we are also able to help to Indian retail companies to expand on European marketplaces.

SC&C partner, spol. s r. o.

Business Line: Consulting and education (Strategy, innovation and productivity).

Profile: The beginnings of our company date back to 1997. First, we offered our clients statistical data analysis in the areas of quality, productivity, marketing, sociological and psychological research. When the founder, Vilem Patloka, met with Martin O'Malley, who was at that time one of the first, in the Czech Republic to hold the title of Master Black Belt, we have included into our services the Lean Six Sigma and Lean Design methodologies. Since 2008 we focus also on innovation and strengthening a team of experts focusing on the management and support of development and production activities in international and indigenous companies.

Seeking for cooperation: with consulting companies for transfer/sharing of the knowledge (Strategy, Productivity, Innovation) and clients. We offer 21 years of experience and know-how in the field of business strategy, innovation, productivity, new product/process development, quality, Lean Six Sigma and data analysis. We offer know-how in English with extensive materials, training-the-trainers, coaching and mentoring. We have a tried and tested customized approach for adding value to small & medium-sized businesses as well as large companies. We would be delighted to partner with a company looking to extended their services locally or are considering expanding into Central and Eastern Europe.

UNICUT, s. r. o.

Business Line: Solid carbide end mills, drills, special tools in solid carbide.

Profile: UniCut tools are the result of gradual development and improvements, often on the basis of customers' requirements. Life itself is the best teacher and our development process matches this motto: customers' workpieces predetermine future final shapes of tools and their dimensions - different machined materials require their geometries - use of sintered carbide as an original material has its limits given by strength, elasticity as well as price. Our standard catalogue is periodically updated and extended. It currently contains 43 time-

tested types of milling and drilling tools. A prevailing majority of our customers is forced to respond to demanding requirements of mostly foreign clients on their production of engineering components. In these cases, we consider the joint design of tools with the customer in order to achieve maximum economy and productivity to be our primary task. As there is an endless number of variations, we as the manufacturers of tools also obtain valuable experience in this way.

Seeking for cooperation: We look for distributors or agents of solid carbide end mills, drills, special tools in solid carbide. We offer milling technology consulting as well.
