Futured

They are the mobile business developers. They create only top mobile apps. Give them an idea, and they'll turn it into a successful mobile business. Custom development, User interface, iPhone, Android, Backend... If there's something they can't stand working on, it's stale, boring apps. And mobile phones are full of them. Your clients deserve much better, though.

Nulisec

Nulisec is building a tech-first wholesale marketplace for European manufacturers. Their mission is to make the wholesale community of makers and producers more accessible to businesses and their customers. That's why they rebuilt the wholesale ordering process from scratch. Nulisec believes the old methods are cumbersome to use and don't enable businesses to take advantage of network effects that are naturally occurring in this industry.

Searpent

Searpent is the world's most advanced visual fraud detection system. They provide various solutions for insurance companies to help with fraud prevention and detection. They use neural networks to visually analyze insurance cases and find frauds. They focus on visual car insurance pricing, visual car accident damage estimation and insurance claim information forgery detection. They provide logo search engine, which analyses tv streams in real time and evaluates visibility of ads. The most successful use is aimed at ads' visibility during football match.

SmartGuide

SmartGuide turns every phone into a personal travel guide. Our B2B2C platform provides tourist attractions and local guides with the easiest way to digitize and monetize their content. We publish it in SmartGuide, an interactive mobile app that uses geolocation, audio and Augmented Reality to guide travelers like a real tour guide. SmartGuide provides more engaging and convenient tour-guiding experience to travelers than traditional guides and revolutionizes the way people experience new places, cultures and traditions during their travels. SmartGuide is the Lonely Planet of the 21st century!
