Nano Fiber MASK A

Medical face mask with **nanofiber filter,** with ties, 4-layers, nsterile.

Protect the environment against the spread of the viral or bacterial infection by filter function of mask material.

Virus and Bacterie Filtration.

Bacterial filtration efficiency (BFE) ≥ 98% Effectively filters virus-sized particles.

The product is single use. If reused performance of product may deteriorate, cross contamination may occur.

Nano Fiber MASK B

Medical face mask with **nanofiber filter,** with ties, 4-layers, nsterile.

Protect the environment against the spread of the viral or bacterial infection by filter function of mask material.

Virus and Bacterie Filtration.

Bacterial filtration efficiency (BFE) ≥ 98% Effectively filters virus-sized particles.

The product is single use. If reused performance of product may deteriorate, cross contamination may occur.

DINA - HITEX®

manager@dina-hitex.com www.dina-hitex.com

DINA-HITEX is an established producer and distributor of medical disposable products based in Bučovice (South Moravia).

The production nowadays concentrates on surgical gowns supplied both sterile and non-sterile, protective clothing for hospital staff, three-layer face masks and others. The used non-woven materials are breathable and comfortable and it assures necessary protection against liquid leakage and transmission of infection. Three-layer face mask material is enriched with silver that assures better anti-bacterial protection.

Further to this, the main key programme still remains the development and production

of highly sophisticated surgical drapes and sets made according to customers' specific requirements.

Surgical drapes, gowns and small sets are packed on automatic line and sterilised in ETO chamber in DINA-HITEX premises, which fastens the production time. Sterile products are delivered to final users, non-sterile are usually manufactured for B2B contracts.

DINA-HITEX with its wide range of products is thus competent to cover the whole spectrum of medical specialities.
