CZECH REPUBLIC PAVILION

7 TECH STARTUPS

This year marks the 50th anniversary of the diplomatic relations between Thailand and the Czech Republic. As we celebrate this milestone, we are excited to showcase our commitment to further strengthening our collaboration in innovation and technology.

At **Techsauce Global Summit 2024**, we are proud to present seven Czech startups, each exemplifying our country's cutting-edge advancements and expertise. We invite you to explore their groundbreaking works and discover opportunities for future partnerships at **Booth No. B6 | Aug 7 - Aug 9, 2024**.

BatteryCheck

BatteryCheck - BatteryCheck helps operate batteries safely and predictably by offering a predictive battery analytics service. This service provides real-time insights into battery health and predicts potential battery issues before they occur, preventing failures.

ECOTEN Urban Comfort - Specializing in urban environmental science and engineering, ECOTEN provides technical services to city planners and urban development stakeholders. They use earth observation and urban microclimate simulation technology to help cities develop resilience to extreme heat through a nature-based urban design approach.

Qeedio

Qeedio - Qeedio enables IT teams to monitor and analyze the operation and performance of IT systems in real-time, identifying potential issues and predicting future risks without being overwhelmed by unnecessary notifications.

WINDEES

Windees - Windees develops innovative wind turbines designed for energy independence and sustainability. Our turbines start generating power from very low wind speeds (2 m/s), making them ideal for continuous operation regardless of time or season. Windees turbines efficiently convert even compressed wind hitting the roof, enhancing overall performance. This technology integrates seamlessly with existing solar panel systems, boosting energy production and contributing significantly to reducing carbon footprints.

BigTerra

Big Terra - Big Terra provides the Carbognostic service, a platform for monitoring regenerative agriculture and carbon farming worldwide. It supplies complex location-based climate and crop data to support sustainable agriculture practices.

MilkyWay® be well

MilkyWay be well - Introducing MyWay analytix®, a groundbreaking eHealth tool for mental health screening and intervention. Using 14 Mental Health Indicators™, it identifies risks and provides immediate, personalized video feedback and interventions, enhancing care with advanced behavioral analysis and predictive modeling.

STRATOSYST

HAPS SERVICES FROM STRATOSPHERE

Stratosyst - Stratosyst is a Czech company developing High Altitude Pseudo-Satellites (HAPS). As a HAPS operator, Stratosyst provides services in earth observation, navigation, telecommunication, testing, and defense.
