

3. Description of Problem, Suggested Intervention and List of Items

*Brief description of the current situation which is to be targeted by the earmarked donation;
list of required items covered by the donation; prospected sustainable use of the donation*

Beit Jala Governmental Hospital was founded in 1908 by a Swedish ophthalmologist, and these days it is the primary healthcare provider for approximately 220,000 individuals residing in the Bethlehem governorate. The hospital has a long and distinguished history of serving the community, and we are committed to providing high-quality medical care to all who seek our services. The scope of our hospital's activities includes providing essential healthcare services to a wide range of population, focusing on emergency care, specialized treatments, and maternal and child health. The hospital's mission is to deliver high-quality medical care, addressing the community's needs even in challenging circumstances. The hospital's vision is to become a leading medical institution, consistently improving the quality of services offered.

Unfortunately, due to limited resources, the hospital has been currently facing a shortage of critical medical equipment. These essential tools are vital for the diagnosis, treatment, and care of our patients. Without these devices, we are unable to provide the level of care that our community deserves.

The earmarked donation will address these shortages by providing essential medical devices that are currently unavailable. This intervention will enable the hospital to enhance its service delivery capacity, improve patient outcomes, and strengthen its ability to handle complex medical cases. The donation is expected to have a sustainable impact by ensuring that the hospital is well-equipped to meet the growing healthcare needs of the community.

The required items include the following:
