

# CZECH STARTUP DAY 2025 CATALOGUE OF CZECH COMPANIES

Ministry of Foreign Affairs  
of the Czech Republic

Co-funded by the  
European Union

Czech Trade Promotion Agency

## Czech Startups

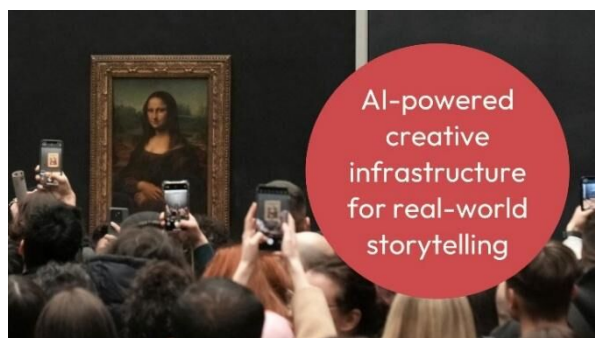

## Aharta

website: [www.aharta.com](http://www.aharta.com)

Aharta is AI-powered platform that transforms heritage sites, museums, and cultural destinations into interactive storytelling experiences — without the need for an app.

Institutions of any size can create location-based games, guided tours, and educational missions using AI avatars, GPS, AR, NFC, IoT, and interactive historical maps — all without coding. Visitors are guided by virtual historians, explorers, or local heroes, uncovering untold stories and hidden layers of history. Organizations retain full control over content and data, with real-time analytics for deeper insights. Aharta is already used by destinations like the Singapore Botanic Gardens to make history accessible, engaging, and relevant worldwide.

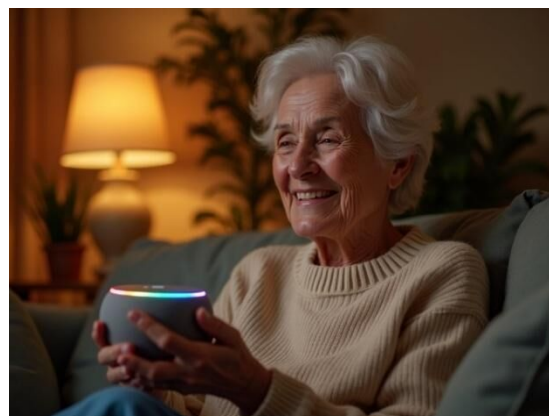

## Alvilo.care

website: [www.alvio.care](http://www.alvio.care)

Our AI-powered voice assistant is designed specifically for seniors, helping them live independently, safely, and with dignity.

The device communicates naturally through voice, offering companionship and reducing loneliness. It reminds users to take medications, drink water, or stay active, and can detect signs of distress such as falls, unusual silence, or changes in mood. In critical situations, it automatically alerts family members or healthcare providers. Unlike generic smart speakers, this solution is tailored to the needs of older adults: it speaks clearly, adapts to personal routines, and remembers details about the user and their family. A connected mobile app allows relatives to stay informed, receive notifications, and configure reminders remotely. Combining emotional support with proactive monitoring, the assistant provides peace of mind for both seniors and their loved ones, making it a unique tool for modern elder care.

## Argutrack Solutions

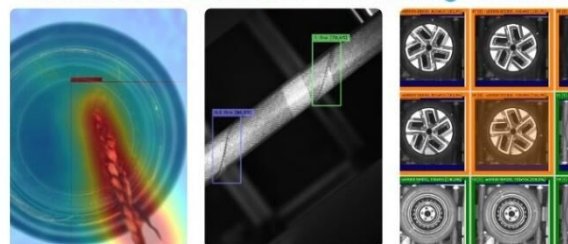

website: [www.argutrack.eu](http://www.argutrack.eu)

Argutrack Solutions, s.r.o. is a dynamic Czech startup developing advanced AI and image processing tools. Its flagship platform, ArgutrackDNN, allows companies to quickly turn their data into deep neural network models without requiring deep AI expertise. With an intuitive interface, users can annotate data, build training sets, and create models for automatic object classification, detection, or segmentation, ready for real-world deployment. Used in industry and research, ArgutrackDNN accelerates AI adoption, delivering fast results and competitive advantage. The company focuses on practicality, innovation, and user experience, offering scalable solutions, flexible licensing, and dedicated support to make AI accessible and valuable for a wide range of organizations.

## Artima

website: [artima.ai](http://artima.ai)

Artima.ai is a Czech startup focused on empowering small and medium-sized businesses to take control of their social media presence. Our all-in-one AI platform combines content generation, image creation, scheduling, and engagement tools into a single, easy-to-use solution.

Today, Artima is fully integrated with Instagram, Facebook, and LinkedIn—allowing SMBs to publish, plan, and manage community interactions directly from one dashboard. What makes us unique is the ability to train a custom AI assistant on each company's own data, ensuring brand-consistent communication while saving time and resources. Looking ahead, we are preparing to expand integrations across additional platforms and enhance our automation features to cover the full spectrum of digital marketing needs. With a growing customer base in Central Europe, Artima.ai is now seeking investment and partnerships to accelerate expansion in Austria and the DACH region.

## Artima

### Artima

The one solution for social media  
that saves time and effort

The first AI tool designed to manage your social media, from content creation to community engagement, all in one place.

## Buylo

website: [www.buylo.ai](https://www.buylo.ai)

Buylo is the most advanced RFID platform built for the future of retail. Seamlessly integrates RFID into retail operations and unlock real-time visibility, automation, and smarter decisions.

By combining RFID technology with AI technology, we provide real-time visibility into products, assets, and supply chains. Buylo enables accurate item-level tracking, automated inventory management, and actionable insights that reduce costs and improve efficiency.

# Buylo

## Cerebrica

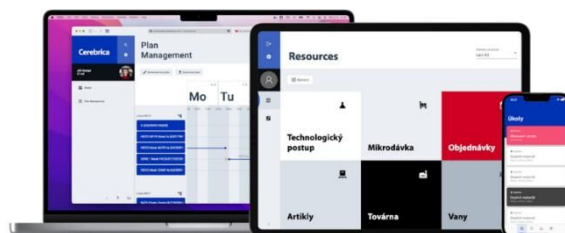

website: [www.cerebrica.com](https://www.cerebrica.com)

Currently, factories are managed by humans, who cannot process large amounts of data in real time.

Cerebrica Optimizer, our AI agent, handles this by planning and rescheduling production based on continuously collected data. It uses a unique composite AI approach combining logic, phenomenal modeling, and non-linear algebra, along with an algorithmic library for production optimization. For inter-company operations, we are experimenting with quantum computing. Serving Czech manufacturing companies, Cerebrica Optimizer increases efficiency by 12–22%. Our vision is to create a group of digital workers and managers to rent to companies, paving the way for autonomous, self-managing factories and a fully digital economy, revolutionizing how industrial processes are controlled and optimized.

# Cerebrica

## CloudBooster

website: [cloudbooster.io](https://cloudbooster.io)

CloudBooster is a next-generation automation platform that makes cloud infrastructure simple, fast, and accessible. Our solution unifies cloud adoption across AWS, Azure, GCP, and local providers through a single platform with zero lock-in. With CloudBooster, businesses can deploy full cloud environments in hours instead of weeks, using automated best-practice templates tailored to their needs.

The platform follows a “bring-your-own-account” approach, giving customers full ownership and control of their cloud resources while reducing dependency on external consultants. CloudBooster empowers startups, SMEs, and enterprises alike to scale with confidence, streamline DevOps, and achieve compliance in complex multi-cloud and hybrid environments.

We are on a mission to democratize cloud infrastructure globally by bridging the gap between local datacenter providers and the big three hyperscalers, creating the world's first truly decentralized cloud marketplace.

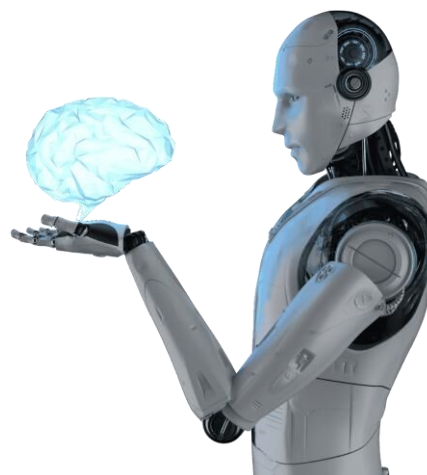

## HolistaCare

website: [www.holista.care](https://www.holista.care)

HolistaCare is an AI-driven platform that redefines mental wellness by tackling today's pressing challenges of stress, anxiety, and depression through a holistic approach. Integrating **sleep, nutrition, exercise, daily habits, and social interactions**.

HolistaCare provides **personalized**, real-time insights for individuals, clinicians, insurers, and businesses. By combining wearable data with emotional analytics, it not only prevents and **treats symptoms** but also offers proactive, science-backed strategies to build resilience, balance, and long-term well-being. Clinicians gain AI-powered monitoring tools, while organizations access API-driven solutions to support employee mental health. With seamless accessibility and actionable guidance, HolistaCare empowers users to take control of their emotional health and thrive in everyday life.

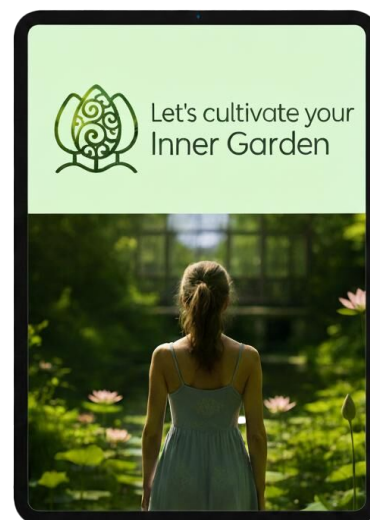

## InnerGarden.ai

website: [www.innergarden.ai](https://www.innergarden.ai)

InnerGarden is a startup combining artificial intelligence and psychology to deliver personalized, scalable, and therapeutically grounded mental health interventions. Our AI platform uses scientifically proven techniques in relaxation, meditation, and audiovisual guided imagery, providing measurable short- and long-term benefits for mind and body. It helps users manage stress, process emotions, prevent burnout, and maintain healthy relationships. Targeting B2G clients—hospitals, social care, and correctional facilities—it can be used by both staff and patients. In B2B, it integrates into employee well-being programs, while in B2C, it functions as an AI-powered relaxation app.

With modular design and AI-driven personalization, InnerGarden can scale globally, making high-quality mental health support accessible to millions across sectors.

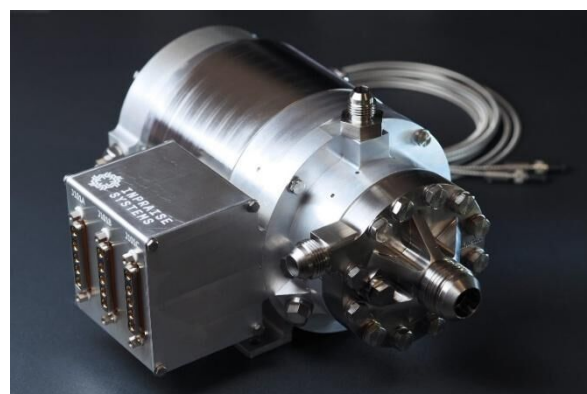

## Inpraise systems

website: [www.inpraisesystems.cz](https://www.inpraisesystems.cz)

Inpraise Systems develops high-speed rotating machinery and subsystems for aerospace, energy, transportation, and industrial applications. The company specializes in small-series production, prototyping, and R&D, offering custom solutions such as space-rated pumps for rocket engines, satellite ASIC cooling, and in-orbit cryogenic refueling. Its portfolio includes complex turbomachinery—pumps, compressors, and turbines—integrated with control and power electronics, as well as high-frequency inverters, electric drives, oilless bearings, and radiation-hardened components. By unifying multiple engineering domains within a single development process, Inpraise Systems achieves fully optimized designs that maximize performance, reliability, and lifespan. This approach supports the advancement of next-generation aerospace and sustainable energy technologies, providing innovative, high-quality solutions for the most demanding applications.

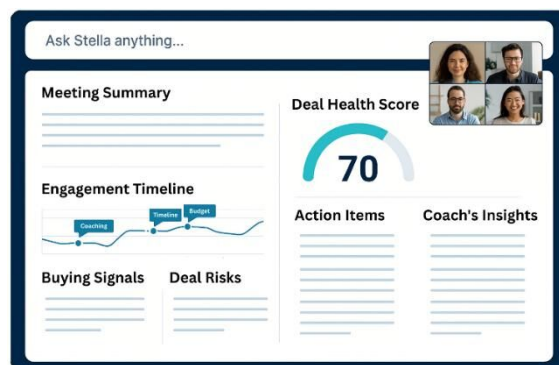

## Nonverbia

website: [nonverbia.com](https://nonverbia.com)

At Nonverbia, we believe sales should feel human and helpful—never awkward, pushy, confusing, or a waste of time.

Our real-time AI co-pilot joins every call, reads the room, and decodes words, tone, expressions, and eye movement. It quietly suggests the next best move, flags interest or disengagement, and updates the CRM automatically. Reps never feel lost; leaders see a living, accurate pipeline; customers feel understood, not pressured. Our agents turn real meetings into coaching moments, helping teams build rapport, learn faster, and sell more effectively. We help you see what others miss and turn conversation signals into simple, confident actions. Privacy, consent, and enterprise security come standard by default.

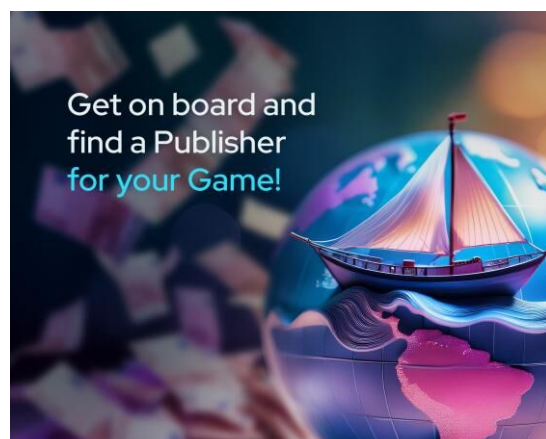

## Sail.Game

website: [www.sail.game](https://www.sail.game)

SAIL.GAME is a one-of-a-kind B2B platform for the gaming industry, connecting developers and publishers worldwide. Built by a highly experienced international team and trusted by 180+ publishing partners and investors, SAIL.GAME was selected for the prestigious EIT Main Innovation Call 2025. The platform offers tools for scouting, matchmaking, and business intelligence — and is now opening its seed round to establish itself as the industry standard for publishing deals in gaming.

## TechInn

website: [tech-inn.cz](https://tech-inn.cz)

Techinn was set up in 2021 in Pilsen, the Czech Republic with the purpose to boost digital transformation in Rail and Public Transport sectors.

With a team of 12 dedicated experts we combine expertise in both transportation and IT domains to create tailored solutions that efficiently address the specific challenges faced by our clients.

We are creating advanced Hardware and IoT solutions to transform traditional transport depot into smart depot.

## Veriteus

website: [www.veriteus.tech](https://www.veriteus.tech)

Veriteus is building AI tools to detect deception. Fraud, false statements, and manipulation cost billions every year and humans are notoriously poor at spotting them.

Modular AI platform analyzes how people speak, respond, and behave. Captures thousands of behavioral signals across audio, video, and digital channels in real time, providing an evidence-based way to assess credibility. The focus is currently on insurance, where the ROI is immediate and the data environment is mature, but our solution extends naturally to HR, compliance, and security.

Designed for enterprise workflows, Veriteus is API-first, privacy-first, and fully compliant with the EU AI Act and GDPR. Our team combines SaaS product delivery expertise with leading researchers in speech science, behavioral AI, and deception detection.

## Viableone

website: [www.viableone.cz](http://www.viableone.cz)

ViableOne develops AI-powered solutions for data automation and analytics in large organizations. Our platform, DataAssist, unifies data from any source, databases, files, streams, and SaaS applications, creating a single dataset that can be queried using natural language. With AI-driven insights, DataAssist helps companies integrate, cleanse, and analyze data faster and more accurately, reducing manual effort and improving decision-making. Many companies already rely on DataAssist to modernize and accelerate their processes. Key strengths include deep integration with SAP and leading ERP systems, enterprise grade security, and customizable solutions tailored to each client's needs. With intuitive dashboards, natural language queries, and rapid setup, DataAssist transforms complex data into actionable insights for smarter, faster business decisions.

viableone

**AI DataAssistant**  
**Turn Complex Data Into Clear Insights**

Our unique data unification technology automatically connects and merges data from any source - structured or unstructured - creating one unified dataset you can query with natural language.

**AI-Powered Business Intelligence**

- Universal Data Unification**  
All your sources in one query. We automatically connect and unify data from any source - databases, files, streams and SaaS applications.
- Build Dashboards Visually**  
Create beautiful dashboards without code - with a drag & drop builder, interactive filters and live data. Share them with your team or embed them anywhere.
- Natural Language Query**  
Natural language instead of SQL. Our AI understands context, connects sources, and instantly returns answers including visualizations.
- Enterprise-Grade Security**  
Bank-Level Security (end-to-end encryption, SOC 2, ISO 27001, GDPR). Your data stays under your control - in the cloud, on-premise and private.

## Vivelo.ai

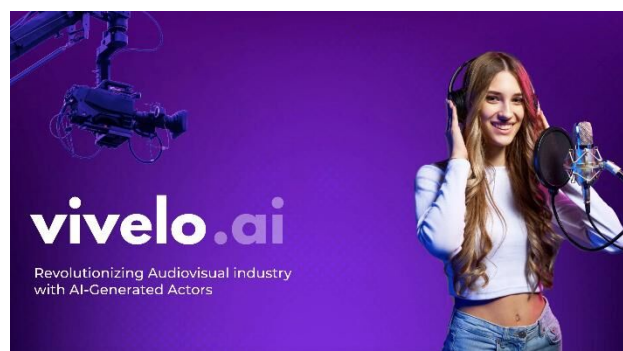

website: [www.vivelo.ai](http://www.vivelo.ai)

**Vivelo.ai** is a next-generation platform for automated voice and video content creation. By combining AI, automation, and databases of actors' voices and faces into a single tool, it enables the production of TV and radio commercials, audiobooks, or instructional videos faster, more affordably, and without the need for actors to be physically present in a studio.

Actors benefit from a dedicated mobile app for license management, project approvals, and royalty payouts. With localized voices and language options, the platform is scalable through various European markets.

Vivelo.ai is the flagship product of AI Produkce, a startup dedicated to building AI solutions for the audiovisual industry. Backed by 15+ years of expertise in film and advertising production, the startup combines deep industry knowledge with cutting-edge AI technologies.
