

## OFFICIAL INVITATION

EUROEXPO FAIRS SRL has the distinguished honour of inviting Czech companies to consider participation in **GREEN ENERGY EXPO & ROMENVIROTEC 2027**, a leading platform dedicated to technologies and solutions shaping the “City of the Future”, focused on renewable energy and energy efficiency, water and waste management, green infrastructure, smart mobility and urban digitalisation. The event will take place on **23–25 March 2027** at **ROMEXPO Bucharest**.

### Strategic Sectors Represented at the Event

#### GREEN ENERGY

- renewable energy
- energy storage
- energy efficiency
- decarbonisation technologies.

#### ROMENVIROTEC

- water management
- waste management
- smart sanitation
- public utilities
- circular economy
- environmental and forestry solutions.

#### SMART CITY TECH

- smart urban mobility;
- digital infrastructure;
- smart public services;
- smart urban lighting;
- urban security;
- technologies for modern administrations.

### International Participation and Business Opportunities

GREEN ENERGY EXPO & ROMENVIROTEC 2027 will bring together:

- international companies and technology leaders
- central and local public authorities
- utility operators
- developers and investors
- solution installers and integrators
- retailers and distributors
- chambers of commerce, embassies and professional organisations.

Following the remarkable success of the 2026 edition, which brought together over 15,000 relevant visitors and more than 750 brands, alongside public authorities, utility operators, investors and industrial leaders from Romania and the Republic of Moldova, the 2027 edition marks a new stage of development, expanding into an integrated platform dedicated to the transformation of modern communities.

Under the strategic concept City of the Future, the exhibition brings together industries essential for sustainable urban development, creating a meeting point for companies, institutions and organisations actively involved in the green transition and the modernisation of public infrastructure.

The organisers would welcome the possibility of Czech companies being represented within a National Pavilion, which could provide a strong platform for organisations interested in strengthening their presence on the Romanian and regional market. This format would offer consolidated visibility, strategic positioning and direct access to key decision-makers, while supporting the development of new commercial and institutional partnerships.

### **2027**Premiere: **INSTITUTIONAL AGORA**

A special strategic component of the 2027 edition is the **INSTITUTIONAL AGORA**, a space dedicated to dialogue between institutions, authorities and the private sector.

Ministries, local administrations, associations of municipalities, chambers of commerce, embassies and relevant organisations will present programmes, investments and strategic directions for energy, the environment and urban development.

This will be the place where exhibitors will have direct access to:

-  real projects
-  public budgets
-  strategic partners
-  direct decision-makers.
