

nanoSPACE®

The sleep revolution begins in the world your eye can't see

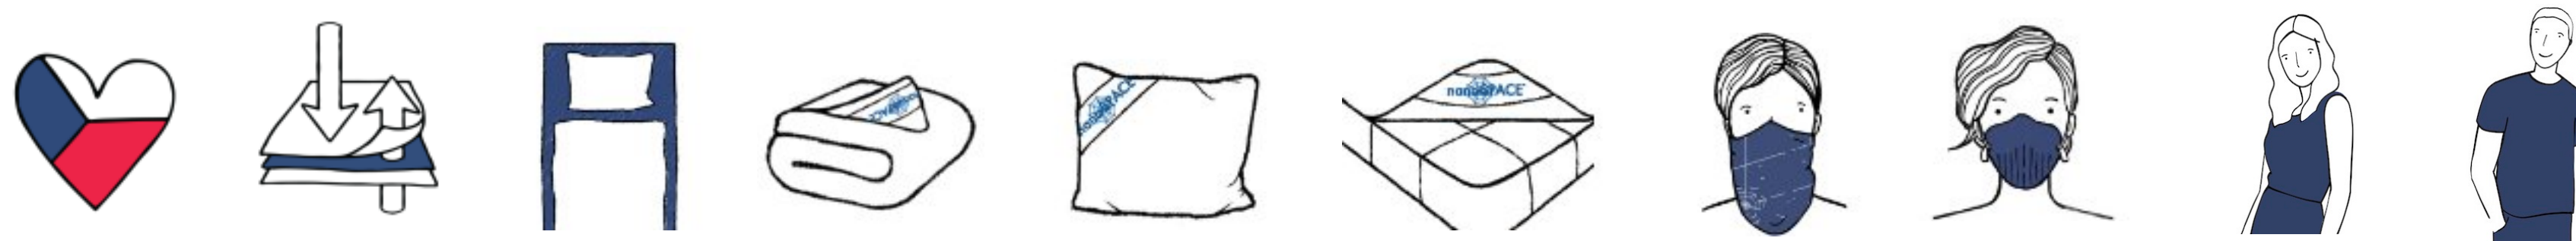

nanoSPACE®

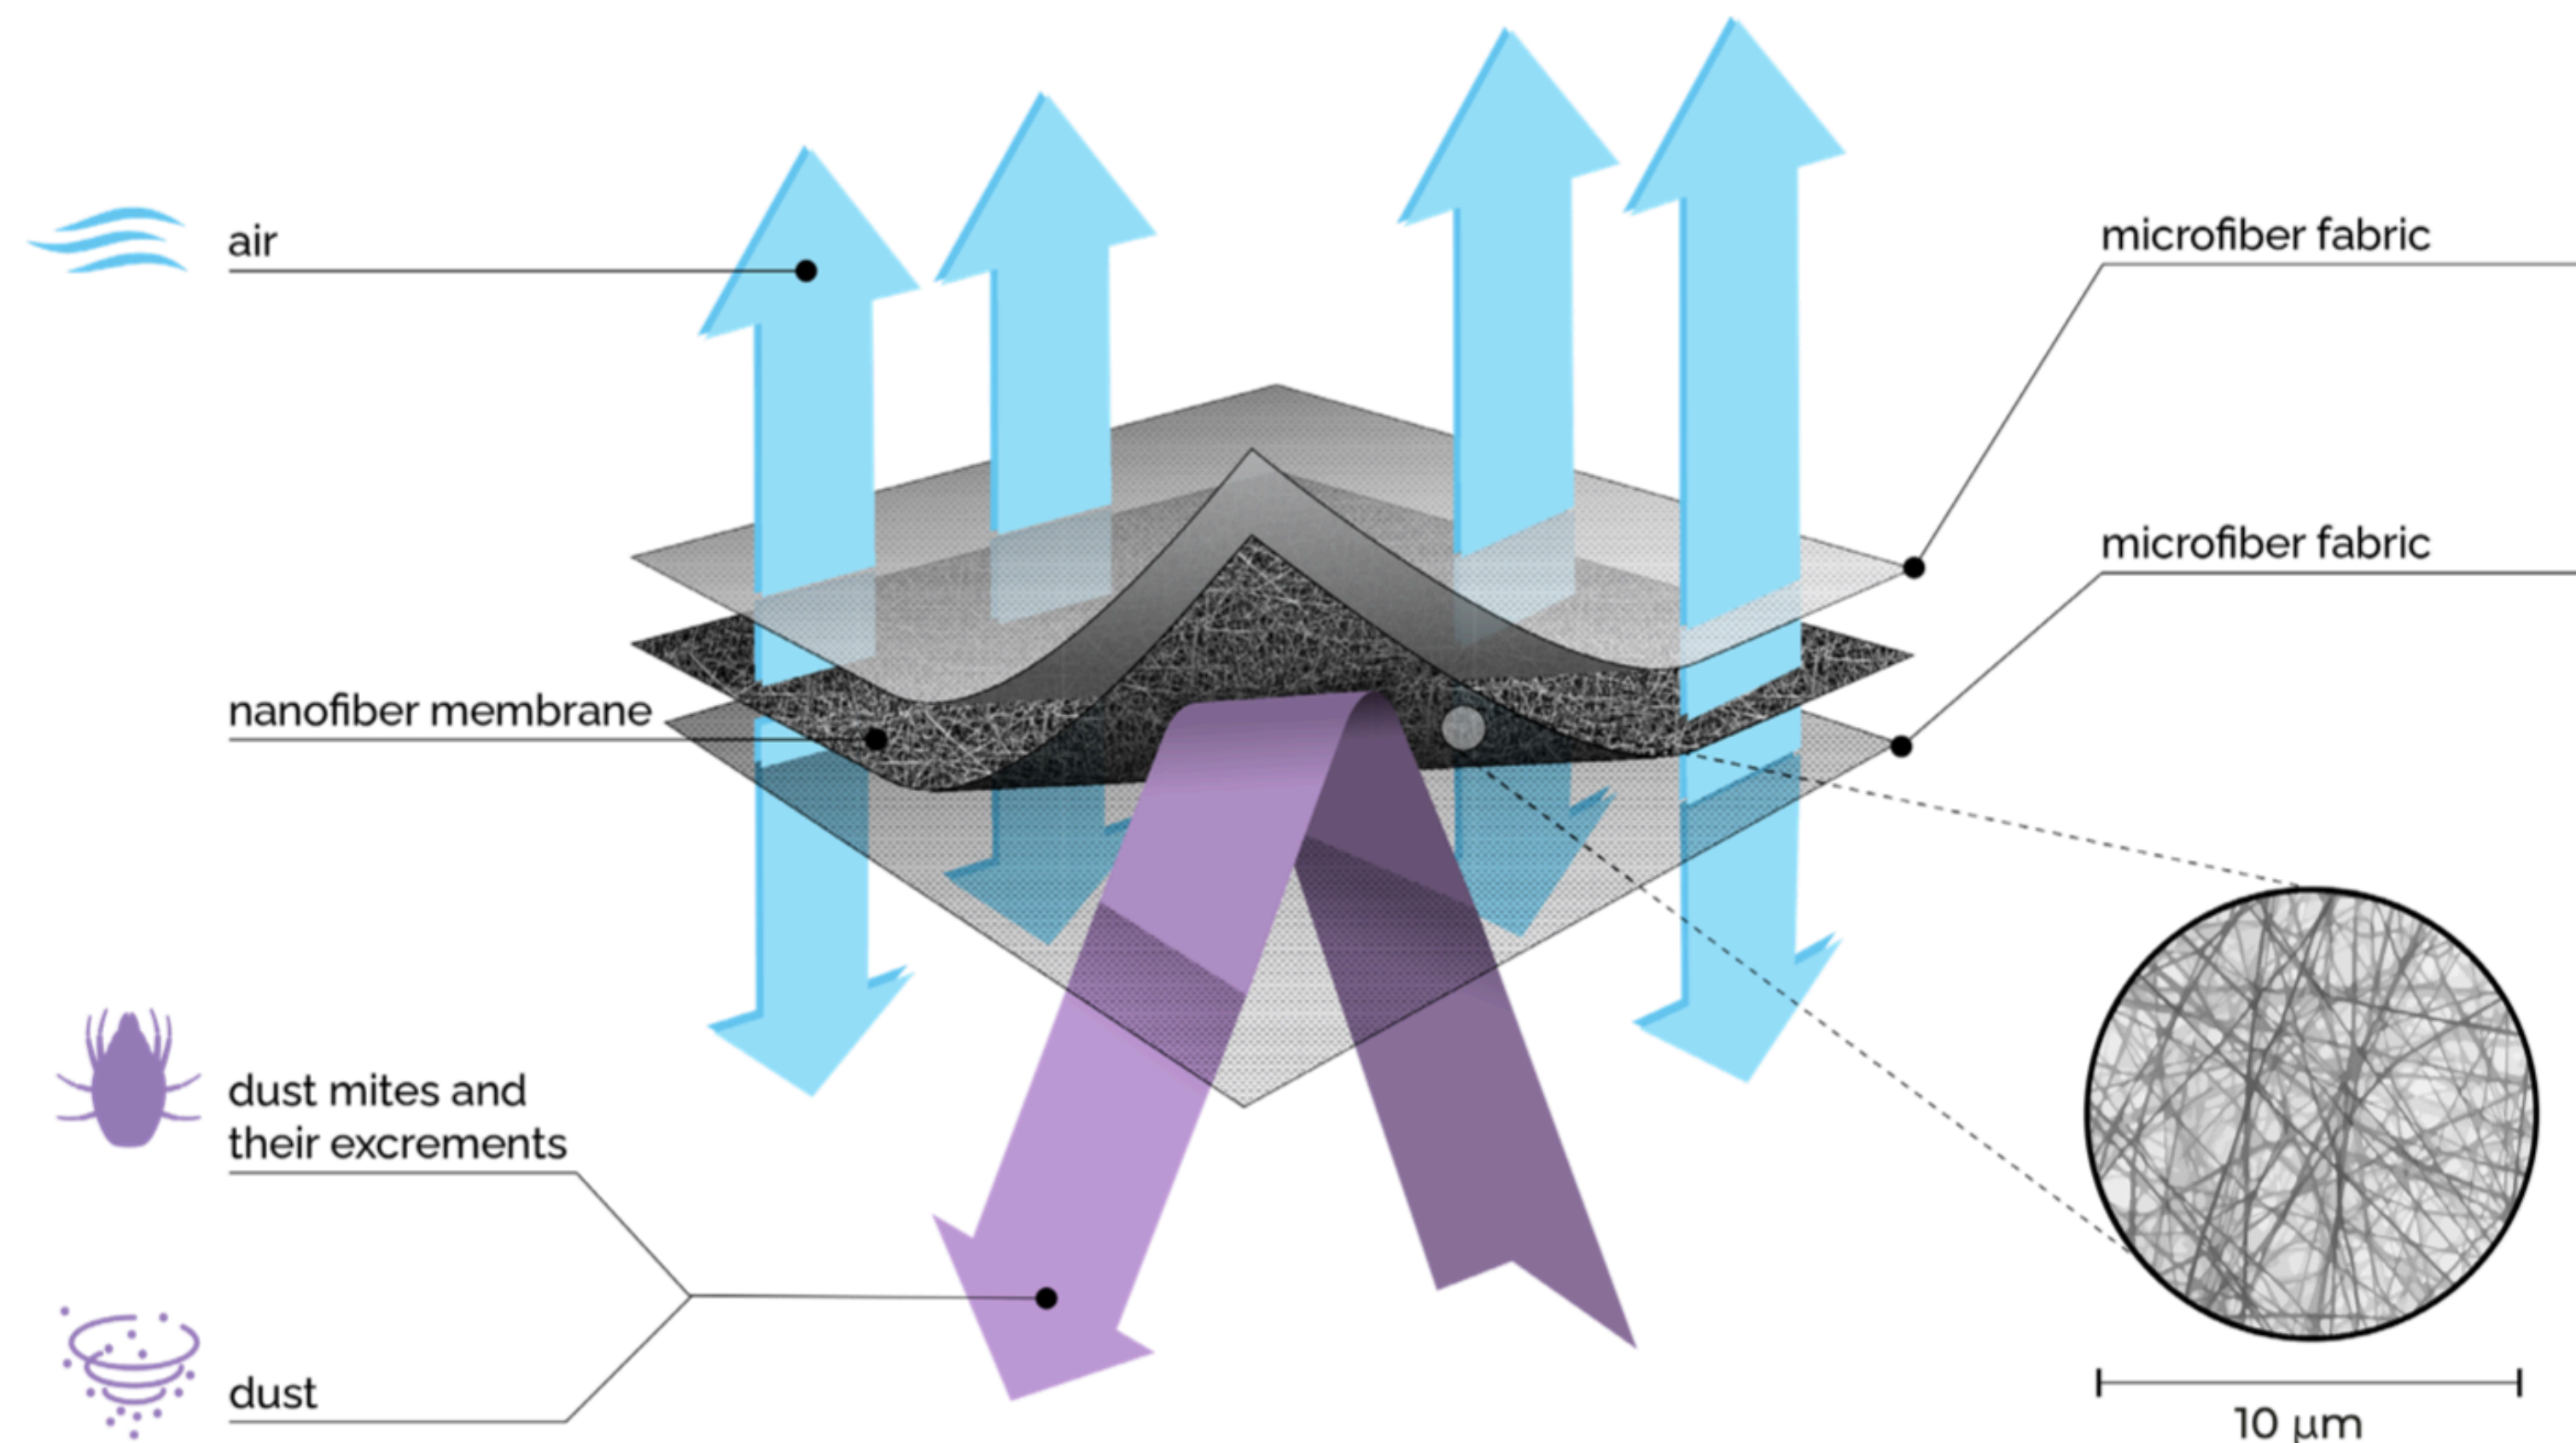

Czech producer of antiviral scarfs and nanofiber barrier beddings for people suffering from allergies. Leading on-line retailer of Czech nanotechnology products in the Czech Republic. In 2021 we have launched our first **slow fashion nano clothing** collection which focuses on quality materials that are produced under fair conditions and **with respect for nature**.

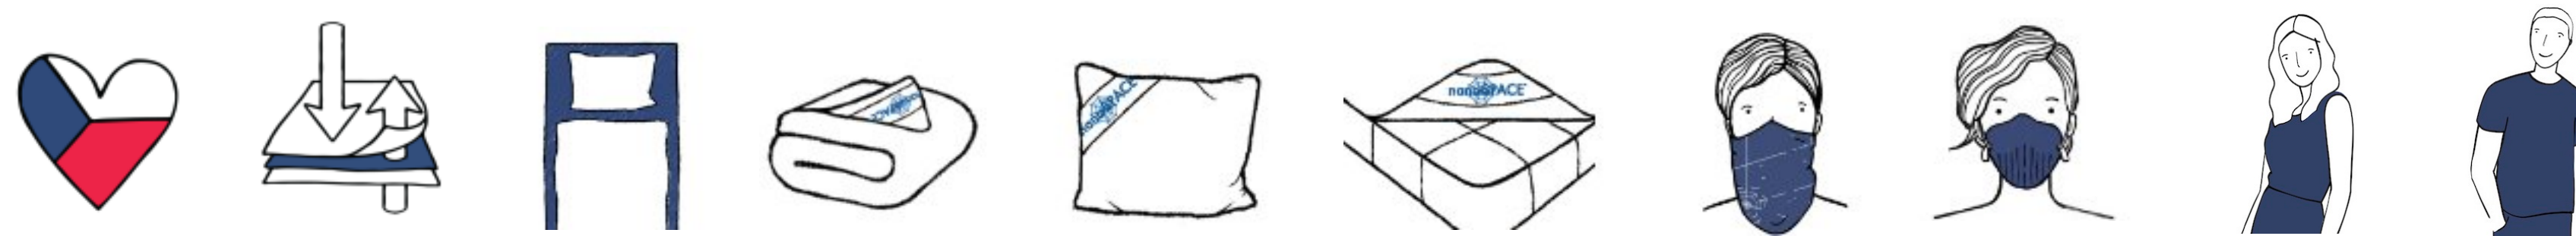

nanoSPACE®

Founded in 2012, the company has been involved in the development and sale of nanofiber membrane products.

Anti-dust mite bedding with a nanofiber membrane was developed to **improve the quality of sleep and life for people allergic to dust mites.**

nanoSPACE®

Environment friendly packaging

Made of grass paper sourced from unused agricultural compensation lands. Such lands are stipulated by the law and they are neither fertilized, nor chemically treated.

The grass paper used for production of grooved cardboard is made of approximately 30% of grass pellets and 70% of recycled paper. Processing of grass pellets for paper production is strictly mechanical, requiring minimal quantities of water and energy.
