## WHY US

Our experience, satisfied clients and, in particular, our brewery guests speak for us.

We will deliver and build your brewery; We will help start your brewery working: train your brewmasters or „lend“ ours; monitor their work; train your staff, or arrange a beer tasting so that you can check for yourself how your brewmaster is doing. We will strive to reduce costs and enhance beer sensory quality and stability. Only a high-quality product will insure long-term profits.

## Consulting

We offer comprehensive brewing consultations. We apply solutions that have proven to be successful. Our experts draw on experiences gathered by the whole group. We know from our experience that natural beer production results in a better product with lower production costs. Feel free to ask us any question! We are creative and love our profession.

## Turnkey implementation

We will set up your microbrewery according to your wishes. We understand that satisfied customer is our best Reference.

## Product and raw material delivery

We love beer, we produce our beer, we sell our beer and helping to sell it even from our customers. We understand that brewing tasty beer ask for quality raw materials – with our microbrewery equipment delivery, we are able to supply you with raw material.

**Rivne, Ukraine,  
delivered in April 2015  
by Czech Brewmasters s.r.o.**

Rivne is a city located in the central part of Ukraine near Zhitomir hop area. The brewery named as „Kant“ with 5-hl brewhouse is part of a larger brewery for testing batches before putting them into large volumes. The customer appreciates the assistance of automation at the brewery.

**Bangalore, India,  
delivered in 2017 by Czech Brewmasters s.r.o.**

Bangalore, a 14 million city in the Indian state of Karnataka in southern India. The restaurant is called „Druid Garden“. The combination of Idic Diversity with Czech Skilfulness has achieved significant results.

The customer is satisfied not only with the equipment but also with the fact that we have given him one of our brewers who brew beer for him according to his wishes.

Interestingly, the equipment was transported by air transport. Likewise, we can also deliver the device to you. Any transport for us is not an obstacle. Now, the client's project ranks among the best microbrewery projects in India at all.

## OUR REGION IS WORLDWIDE

Over the course of our history, our company has already consulted about 100 breweries, more than 30 breweries built and our brewmasters worked about 30 countries around the world. As an example of the countries where our brewers operated or where we delivered the brewery, we present Greece, Poland, Croatia, Japan, India, Nigeria, Ethiopia, Peru, Russia, Vietnam and many others.

## ABOUT THE COMPANY

PACOVSKÉ STROJÍŘNY are traditional and dynamic Czech company with a leading position on the Czech engineering market and with a major share of foreign markets. We make complex technological and processing units for the food, chemical and pharmaceutical industries and agriculture. The product portfolio of the company includes twelve specialized divisions, which are based on highly professional processing of high-grade stainless steel and copper materials.

Start of production in PACOVSKÉ STROJÍŘNY dates back to 1876, when coppersmithery and kettlesmithery workshops were established by the Hradecký's family in Pacov. The focus of the workshop grew from the original manufacture and repair of agricultural equipment and production of distilleries in other industries, most notably in the food industry. Due to significant production expansion, the construction of a new plant at the present address was carried out following in the years 1957-1963.

In 1991 the company PACOVSKÉ STROJÍŘNY, a joint stock company, Pacov, got started. It continues with its production programs to the long tradition and at the same time undergoing a significant innovation according to the requirements of domestic and foreign markets. The company is a part of SAFICHEM Group, whose members act in precious metals processing, chemistry and pharmaceutical industries.

# ČERNÁ HORA BREWERY

THE CZECH REPUBLIC

420 hl lagering tanks

We deliver minibreweries in various versions with a capacity of 20,000 hectoliters of beer per year. Technological equipment for small regional breweries is designed especially for all areas with demand for a wide range of quality beers for restaurant and hotel facilities or convention and entertainment centers. We also regularly produce technological equipment for breweries. We offer both partial deliveries of individual operating units and a complete supplies of "turnkey" breweries.

8 CK tanks with a volume of 20 hl

# LYER MINIBREWERY

THE CZECH REPUBLIC

Block brewhouse with a volume of 11 hl

An important and traditional part of the PACOVSKÉ STROJÍRNY production program represents supplies of technological equipment to breweries and minibreweries from a beer output of 250 hectoliters to 400,000 hectoliters per year. Our team of qualified experts is able to design optimal technological equipment either of new breweries or to make a proposal of the process for reconstruction and modernization of existing plants. In every way we meet the individual requirements of our customers.

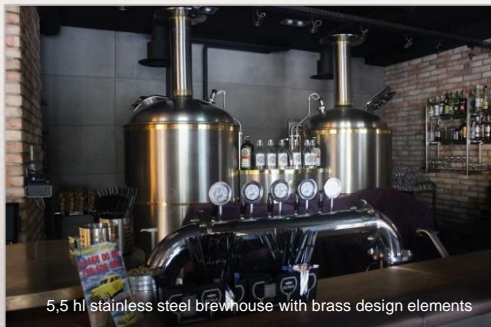

The high quality of our supplies ensures their durability and reliability, every solution takes into account the latest trends in the brewing industry. The characteristic feature of our equipment for breweries and microbreweries is a professional craftsmanship. Within the portfolio of customer service we provide installation works, performance testing and operator training

5,5 hl stainless steel brewhouse with brass design elements

Beer lovers increasingly prefer to a drink that is not filtered, chemically stabilized and is drawn "directly from the source." PACOVSKÉ STROJÍRNY took up on the growing global trend of restaurant minibreweries and building and has installed in several locations in Europe, America and Asia. Because the brewing of beer from A to Z of alchemy, PACOVSKÉ STROJÍRNY provide an experienced brewer who will show you how to do it.

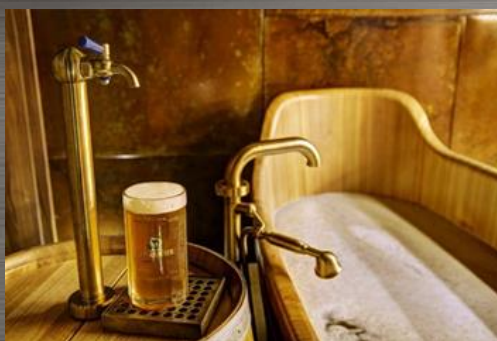

## ZLOTY UL MINIBREWERY

POLAND

## ROŽNOV BEER SPA

THE CZECH REPUBLIC

Famous Czech proverb says: "Beer makes beautiful bodies." But this may not only apply to the hoppy taste connoisseurs. Brew beer that not only the body but also the soul can relax upon. PACOVSKÉ STROJÍRNY will provide you with a complete supply of equipment for beer spa.

6 CK tanks with a volume of 60hls

# Τεχνολογίες εμφιάλωσης – NATE a.s.

NATE - nápojová technika a.s.  
TECHNOLOGICKÁ ZARÍZENÍ PRO NÁPOJIVÝ PRŮMYSL

**NATE - nápojová technika a.s.**  
Czech Republic

**Original solutions for qualitative  
filling for breweries**

- More than 60 years of experience in delivering complete bottling lines, delivered worldwide.
- 9 400 m<sup>2</sup> production area.
- 230 employees – 50 technicians.
- 3D – design in Pro/ENGINEER and AutoCAD.
- CNC machine tools for the production of highly precise components.
- Cooperation with the Institute of Chemical Technology in Prague, the Research Institute of Beer and Malt, and the Research Institute of the Food Industry.
- Certificates: ISO9001, ISO3834, GOST.

# FILLING OF BEER

PET OR GLASS  
BOTTLES FILLING

CAN FILLING

KEG FILLING

# FILLING TECHNOLOGIES

- Manual PET or glass bottles fillers (up to 200 bph)
- Semiautomatic PET or glass bottles fillers (200-600 bph)
- Automatic or semiautomatic KEG lines (15-60) K/h
- Automatic linear CAN fillers (up to 1200 cph)
- Automatic rotary fillers (from 1200 cph)
- Mechanical filling valve
- Electro-pneumatic filling valve
- Electronic filling valves with flowmeters

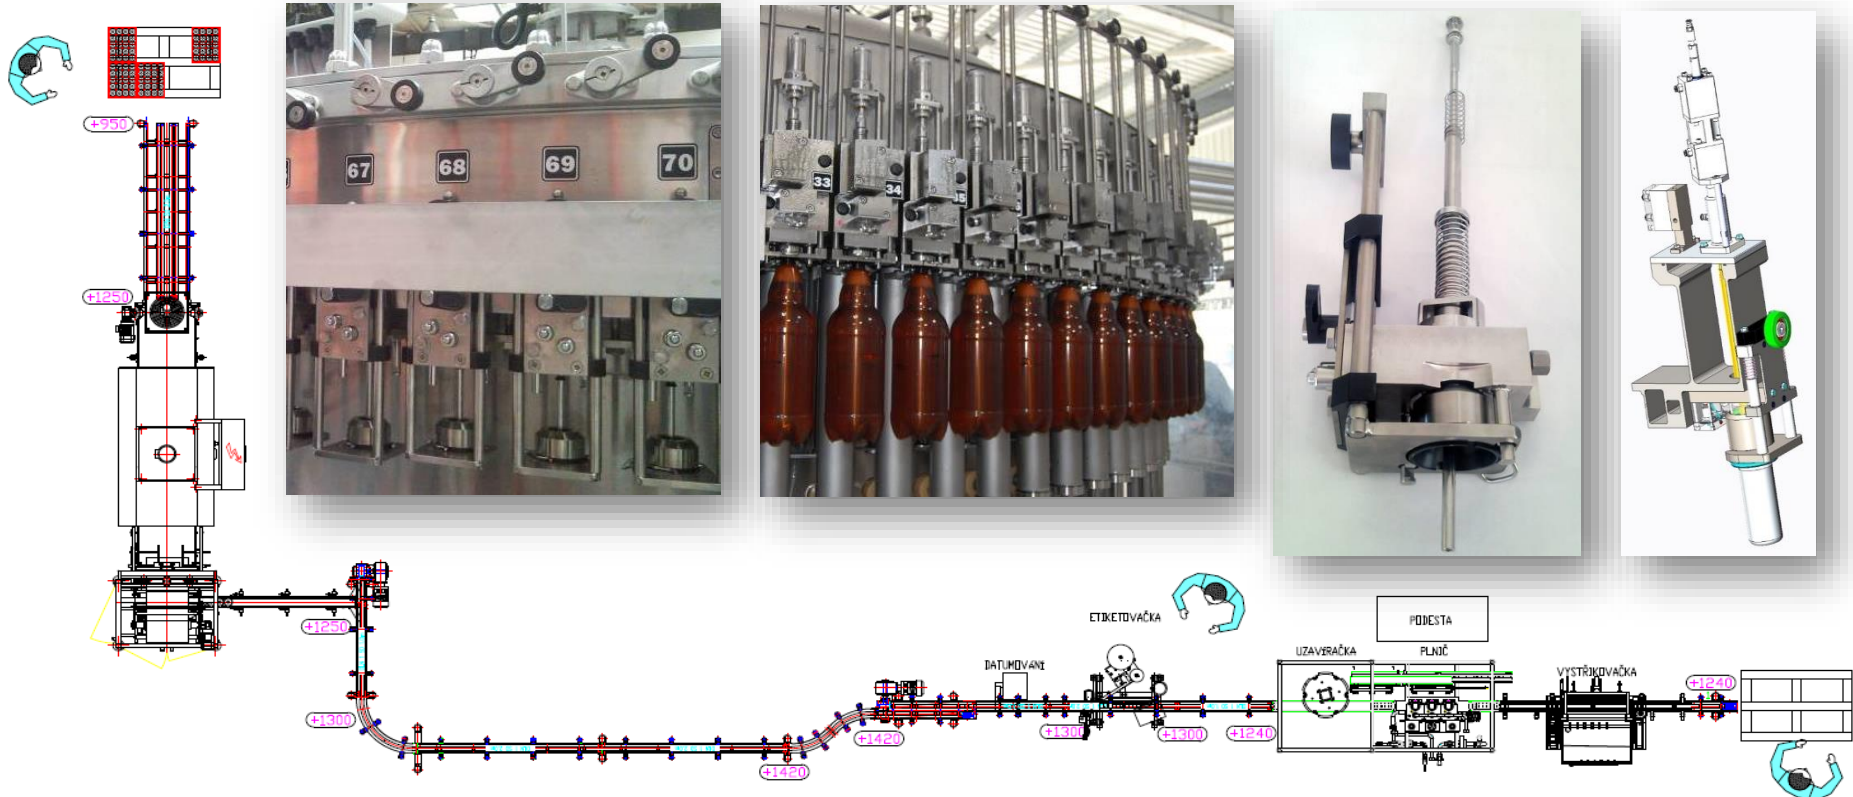

# NATE'S COMPETITIVE COMPARATIVE AND DIFFERENTIAL ADVANTAGES

- Suppling of a new complete filling lines or individual machines for the production and filling of drinks separately (fillers, integrated monoblock, pasteurizers, syrup makers, CIP stations etc. – original Engineering of filling solution)
- MAIN ADVANTAGES: optimal pressure for sensitive beer filling – proper pressure shifting after filling – perfect filling accuracy:  $2 \pm 2$  ml upon very low oxygen increase during filling
- Increase in oxygen during filling into the glass bottles – single or double vacuum deaeration (result oxygen - up to  $0.03 \pm 0,02$  mg/l)
- Increase in oxygen during filling into PET bottles – rinsing of PET bottles with  $\text{CO}_2$  prior to filling (result oxygen – up to  $0.5 \pm 0,02$  mg/l)
- Application of Top technologies, designed for high capacity rotary machines into the small capacity linear type machines
