What is URBIS Smart City Fair?

- a **unique platform** for the transfer of knowledge and experience within **CEE**
- you will get a general overview of the current trends, challenges and you will get a chance to meet the most professional people in the field
- the place where opportunities start to become a reality
- we will inspire you to ask for what is required in your home
- 4th full-featured edition

How the event will take place?

- online platform

Content:

- Conference
- Expo
- Networking & Matchmaking

Why participate in URBIS Smart City Fair 2021?

The pandemic has not hampered the advances of local governments and, on the contrary, creates opportunities for putting innovation into practice.

- **co-creators of the event, exhibitors** - the opportunity to meet people who decide on the needs of local governments in one place, up until now a difficult task to make happen.
- **visitors** - you can gain awareness of current trends, experiences and current solution offers in one place, so you can stay informed.

Whom is URBIS Smart City Fair meant for

Innovation leaders, suppliers of solutions for cities

Present your technologies, visions and solutions to those who will decide on their involvement in people's lives. Whether you are a big multinational company or a local visionary firm, you'll best show your products at this fair to those who are really interested in them.

Regions, cities, municipalities and other self governance bodies

Get inspired on how to build a modern city, village, or organizations owned or managed by them. Present your projects and get partners for them. URBIS will make you meet people who have great ideas and will help you bring them to life. Pick from a wide range of specific solutions, thanks to which your city or municipality will become a more pleasant place to live.

Start-ups and investors

Do you have a great idea of how to improve urban life? Want to show it to potential customers or investors? Are you just looking for inspiration and space to share ideas with other creative people? Brno is a city with exceptional innovative potential that intersects at the URBIS trade fair.

Active citizens and NGO's

You are the users of smart solutions brought about by the Smart City concept. What will our life look like in the future? How will smart technologies impact the cities, towns or villages you live in? Just come and take a look.

Academic communities and students

Introduce your projects or ideas to people who can convert them into reality. Get inspired and meet Smart City professionals. They will arrive from all over the world.

What can you expect?

WHAT?	Presentation of smart and innovative solutions, inspiration, what to demand	Implementation and management of changes, how to implement changes	Sharing practical experience and inspiration on what to solve and how	How to finance change, networking opportunities	Presentation of study and training programs with an impact on change	Finding qualified employees

The City of Brno has long supported the URBIS Smart City Fair, in which it sees significant potential for gaining and transferring experience or for creating an image of what can be achieved in the field of smart city development.

In the current situation, it is not only local governments that face many challenges to address. These challenges create a lot of room for the implementation of innovation and change.

In September, despite all the measures, the last year's fair took place. Here, despite the success of digitalization, we realized the need for social contact, and therefore we increasingly see URBIS Smart City Fair as a unique platform for developing innovations in local governments in Central and Eastern Europe.

Markéta Vaňková, Mayor of the City of Brno
