WATER TREATMENT with OZONE

Ozone is the solution for water treatment

- Ozone is **hundreds of times more powerful** than chemical water treatments.

- Ozone is even **effective against chlorine resistant organisms,** algae, bacteria and viruses.

UV system offer green alternative to environmentally harmful chemicals used for disinfection including chlorine, chlorine dioxide, and hypochlorite.

Germicidal lamps generate energy in the UV spectrum to destroy bacteria, fungi and viruses (microorganisms). Microorganisms include several distinct groups of disease causing germs (viruses, bacteria, fungi, algae and protozoa). UV is highly effective against cryptosporidium and giardia – **organisms resistant to chlorine that are major risk to human health.**

Another advantage of UV is the absence of taste and odour.

Chloramines + Ozone

= Crystal clear natural water, free from toxicity

Ozone is making your water crystal clear, odor free and safe to drink!

HIGH-TECH SOLUTION WITH **SunLuc Powerplant!**
