

## TECHTEXTIL ROUND TABLE – CZECH AND GERMAN COMPANY MEETING

Venue: Techtextil Messe Frankfurt, Room CONCORDE, Hall 4.C

Date: 10th May 2017 at 1 p. m.

### List of the Czech companies:

1. **APPLYCON** - [www.applycon.cz](http://www.applycon.cz)

Main production fields are: wearable electronics, intelligent textiles, connector technologies, and cable assemblies. Specialized in applied development and manufacture using of modern systems, materials and manufacturing designs.

*Interested in cooperation with companies from the branch of Smart Textiles and Wearable Electronics  
Looking for partners for joint development of new materials and wearable electronic systems.*

2. **CLINITEX** - [www.clinitex.cz](http://www.clinitex.cz)

Producer and distributor of medical clothes and clothing suitable for the health care environment, surgical gowns and bedlinen with close up at renting the textile to the industrial laundries market or the end consumption.

*Looking for partners in the field of laundry services, supplies patient, personnel and bed linen to medical equipment, supplies surgical clothing into clean spaces of medical facilities, emergency services and the supply of clothing for these purposes.*

3. **TZU -Textile Testing Institute** [www.tzu.cz](http://www.tzu.cz)

Leader in branch of testing and certification and involved in many other activities within the experimental development. The accredited testing laboratory is a credit to its accreditation number, which is 1001, and offers several hundreds of tests for nearly all types of textile products.

*Interested in all types of textile producers.*

4. **GUMOTEX** - [www.gumotex.cz](http://www.gumotex.cz)

Supplier for automotive industry, especially in the interiors of cars and trucks; in the water sports and active recreation sector – e.g. dinghies and rafts as well as in rescue systems for crisis situations – e.g. inflatable tents, flood defenses, decontamination showers, etc. A major aspect of production is in the area of air-filled systems for a wide range of applications, mainly in the furniture industry. Well-known company in the field of plastics processing with a special focus on products manufactured with polyurethane or EPP foam bases and on rubber textiles with high utility properties.

6 product groups : Rubber & Coating, Automotive, Boats & Outdoor, Rescue systems, Air chambers, Automation technology

*Interested in processors of technical textiles or surface treated fabrics (PVC, PU, PE, TPE, rubber mixtures) for industrial, clothing and other applications.*

5. **SVITAP J.H.J.** - [www.svitap.cz](http://www.svitap.cz)

The range of products and services includes the manufacture and sales of technical fabrics (tent and canvas fabrics, linen fabrics, filtration fabrics) and technical ready-made products (tents, halls, covers, gazebos), fabrics for work clothes, roof membranes and other foils, synthetic leather and the binding PET tape. It includes also microfibre home textiles sold under brands of Sleep Well® and Ovečka® and also bedspread fabrics, cleaning textiles, tablecloths, tea towels and bath towels.

The company offers also a finishing and dyeing of fabrics.

*Interested in cooperation in technical textile production*

6. **HEDVA - [www.hedva.cz](http://www.hedva.cz)**

**Business Activities:** Production and sales of textile goods, Production and sales of threads, yarns and mill sifters, Purchase of goods in order to sell it and sales. **Production:** Technical and special fabrics, Fabrics for garden furniture and prams, Lining fabrics, Decorative fabrics, Ties and bow ties, Individual products, Threads and knitting yarns, Production and sales of textile goods

*Interested in the clothing industry companies*

*Looking for customers of jacquard and technical fabrics*

7. **BN INTERNATIONAL - [www.bnint.cz](http://www.bnint.cz)**

Producer of bookbinding materials, laminated fabrics and fabrics for abrasive cloths.

*Interested to set in contact with the weaving companies*

*Looking for partners in finishing -coating, dyeing*

*Looking for potential customers for, digital printable materials, Abrasive backing cloth*

8. **VÚB - [www.vubas.cz](http://www.vubas.cz)**

Core business activities: applied research and development in the field of textile and textile machinery, specialized machinery production, special textile production - yarns and special final textile products :

rotor blend spun yarns with the share of flax, hemp, 100% flax fibres

high-functional rotor blend spun yarns for special and technical applications - heat and flame retardant yarns, antibacterial, antistatic, multifunctional

special textiles as well as protective and working end-products marketed directly by VUB under the registered trademark CleverTex®

*Interested for companies – partners from the field:*

*SMART TEXTILES - CLOTHING, HEATED TEXTILES - CLOTHING CLOTHING WITH wearable electronics*

*Electrical company engaged in the production of electronics - to a ESD*

*Distribution companies, wholesalers of OUTDOOR products for foresters, hunters, fishermen, tourists*

9. **VEČERNÍK**

*Interested in companies dealing in finishing of textile materials with focus on their metallizing*

*Looking for partners for cooperation in production of metallized textile materials*

10. **CHLUM-TEX - [www.aratex.cz](http://www.aratex.cz)**

Specialized in the production of the cleaning rags, textiles upholstery for automotive industry and other materials for use in manufacture of furniture upholstery.

*Interested in cooperation with the partners of nonwoven textiles and upholstery.*

11. **GF MACHINERY - [www.gfm.cz/cz](http://www.gfm.cz/cz)** Complete solution for fiber and fabric glass processing. The largest division of GF Machinery is an engineering and R&D department ready to meet any challenge from customers who are looking for the latest machinery and technology. Most of the manufacturing is outsourced. Final assembly, testing and QC is done at the premises under direct control of GF Machinery

*Interested in companies from the field of glass fabric processing*

12. **KORDÁRNA PLUS– [www.kordarna.cz](http://www.kordarna.cz)**

Belongs amongst the world's leading manufacturers in its field and is the only integrated European supplier that undertakes the entire process of production of technical fabrics – from the production of fibre to that of the final fabrics. The products are utilised in the automotive, rubber, engineering, mining and construction industries and are marketed in Europe, Asia, South America and Africa. KORDÁRNA Plus a.s. manufacture technical fabrics for industrial use; the customers are the leading European manufacturers of tyres.

**Interested in suppliers of synthetic fibers and viscose for use in technical textiles and producers of tyres and conveyor belts.**

13. **INOTEX – [www.inotex.cz](http://www.inotex.cz)**

Research, development, service and transfer of technologies. New Technologies, Colouristic Services, Short-yardage Textile Finishing, Short-run Machinery Production, Centre of Ecology, Technical Informatics, Testing Laboratory No. 1102 accredited according to ČSN EN ISO/IEC 17025, Technical Standardisation, Finishing Machinery Advisory, Expert Reports, Defect Solutions & Textile Production, Complaints, Law-suits & Textile Production, Textile database, CTTV – The Center of Textile Technologies and Education

**Interested partners from the sphere of Health care/Elderly people textiles ((VTi / Sachsony Program) and PPE – FR, Water-repellent systems, protection/comfort**

**Interested in contact with Textilausrüstung Pfand, STFI, Plocquet Zittau, Sachsenleinen**

**Looking for partners (cooperation, investment, customers): Textile Auxiliary Agents, Dyes and dyeing processes – sales and services**

14. **STAP – [www.stap.cz](http://www.stap.cz)**

Manufacturer of narrow fabrics, chain zippers and zipper tapes, webbings and straps, woven labels and badges, gift-wrap ribbons, strings, cords and shoe Laces, woven insulation tapes, tapes with optic fibres and other safety elements, non woven textiles. Last company in Europe manufacturing Jacquard ribbons, which are particularly used for folk costumes and other decorative purposes. Supplies for the automotive, electrical, military, health care, haberdashery, garment and shoe making industries.

**Interested in companies from the field : Electrical (manufacturing of electric motors, cables, stators), agriculture, technical textiles**

**Looking for customers**

15. **NYKLÍČEK a spol. [www.nyklicek.cz](http://www.nyklicek.cz)**

Technical woven fabrics are produced with modern air-jet and rapier weaving machines, with an annual production of about 4 million running metres. They are able to produce fabrics 80 to 330 cm wide, made of cotton, viscose, polyester and its mixtures. Products: bookbinding fabrics, fabrics for graphic industry, abrasives backing cloth, fabrics for adhesive tapes, fabrics for laminating and coating. Home textiles: bed linen, towels, kitchen towels, table linen, decoration fabrics, mattress ticking.

**Looking for customers**

16. **VÚTS - [www.vuts.cz](http://www.vuts.cz)**

VUTS focuses on the research, development and manufacture of machinery and equipment for the processing industry, above all, in the area of machining, textile, printing, food, packing and medical engineering. VUTS also deals in the automation, development, design and construction of special single-purpose machinery, manipulators, conveyors and testing equipment, especially, for the suppliers in the automotive industry. VUTS activities are characterized by offering a complex set of services from the research and development, design processing to the implementation of a complete technological unit. VUTS disposes of own production capacities to ensure the prototype and small series production of machine parts, machinery and equipment.

**Interested in companies: producers of woven technical textiles**

**R & D institutes engaged in research and development in the field of textile machinery**
