### Getting Family and Relatives together

With over 20 years in business, we are highly experienced in organizing group tours, large and small, and have up to date extensive knowledge of all areas in the Czech Republic, - that's our SPECIALTY. An additional assurance for you is to know that we were born there, grew up & lived there almost 30 years, speak the language, know the history of the homeland, know our way "around" (not just areas packed with tourists), understand the mentality of the people and expectations of American travelers and much more. That kind of LIFE experience you can NEVER learn from any books, schools or traveling there even 100+ times as a tourist! There is no doubt about it, that it gives us a great advantage (to your benefit) over our competitors. We are the best choice for you! We know where to go to find the things you are looking for and get the right answer to your needs including information about your ancestry research (many times the latest, private information from villagers), which **couldn't be found in any archives!** In addition, you should know that we have a large network of providers and contacts to the right people at the right places.

We will custom design a Private tour  
for **couples** or your **whole family & friends.**

Since 1995, **FREE** **ltd.** ancestry research, made by a Czech native, is always part of the tour. We don't know of and have never heard of any other travel agency who can provide you with this **unique valuable service** at no cost to you.
