INSPIRELI

AWARDS 2015

ARCHITECTURE AND DESIGN TALENT COMPETITION

After five years of work, we launched the first global social network for architects INSPIRELI with the aim to invite all universities of architecture and design and enable all their students and graduates to interconnect with the world without geographical or social borders. There are already competitors from the Czech Republic, China, Mexico, Russia, Lithuania, Moldavia, Ukraine, Slovakia and other countries enrolled in the competition INSPIRELI AWARDS.

Your students or graduates up to 30 years of age are invited to present their projects and ideas in the area of architecture and design at INSPIRELI and start working on their future careers.

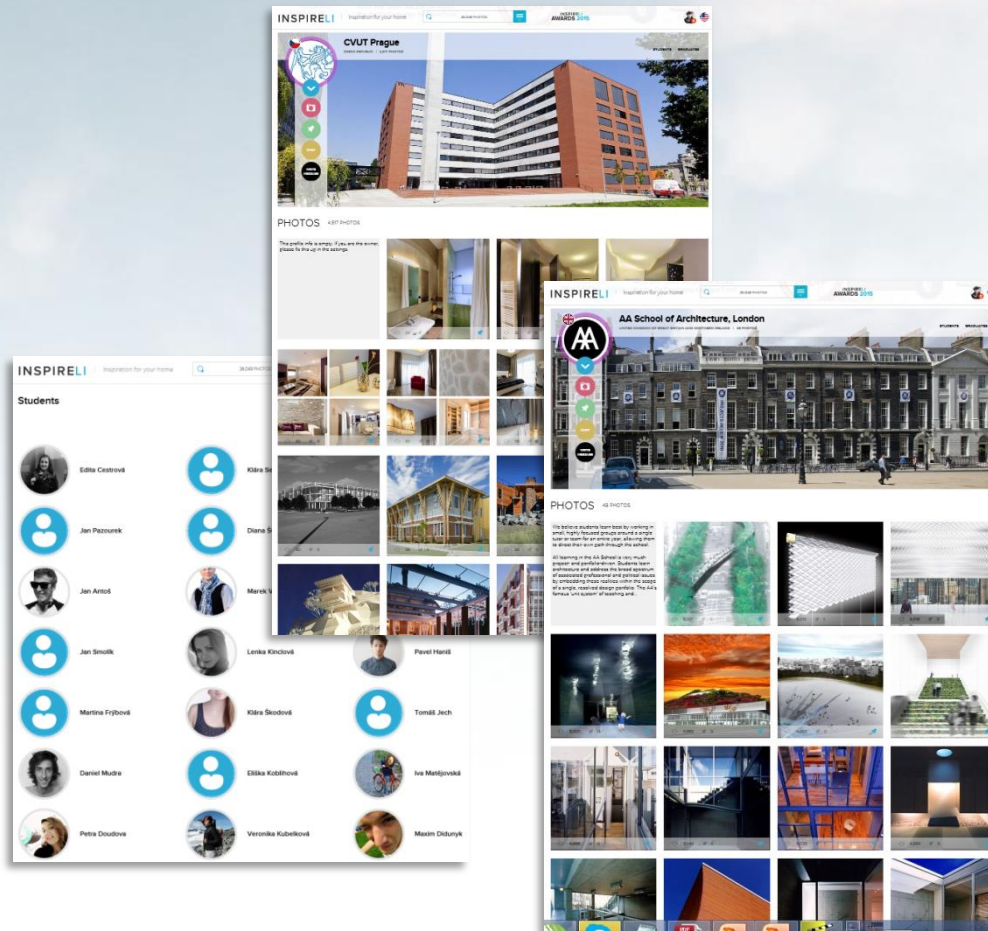

Our project was built for you and your students and we are looking forward to their works.

Ing. Karel Smejkal, Ph.D.

IDEA

„I am worried about so many talented students of architecture and design who remain unidentified forever.

I and my friends decided to do something with it and we created the project INSPIRELI.“

WE DISCOVER TALENT

INSPIRELI

IDEA

„We decided to create the first professional photographic social network for the architects worldwide.

You can easily and immediately communicate the gallery of interior and exterior building designs with the author stated under the photo.“
