

CONFEDERATION OF INDUSTRY
OF THE CZECH REPUBLIC

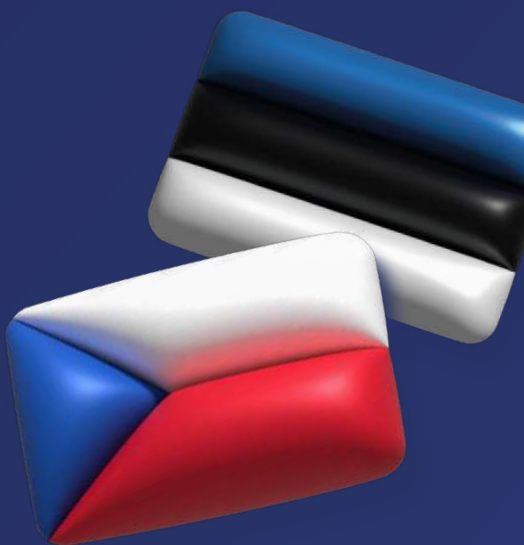

Czech Republic

Business Delegation

26-28 May 2026

Tallinn, Tartu

An Overview of the Czech Republic
Business Delegation Accompanying
the President of the Czech Republic,
HE Petr Pavel, on His Official Visit to Estonia.

CONFEDERATION OF INDUSTRY
OF THE CZECH REPUBLIC

Confederation of Industry of the Czech Republic

Direct line to the Czech business
and authorities

Our mission is to create a favorable business environment and represent the interests of thousands of Czech companies in various industries.

What we do...

- We set better conditions for business.
- We help exporters reach new markets.
- We comment on the legislation.
- We have an open dialogue with the government.
- We organize business trips around the world.
- We propose strategic changes across sectors.

More about us

www.spcr.cz/en

Petr Pavel

President of
the Czech Republic
Prezident České republiky

Ladies and Gentlemen,

From 26 to 28 May, I will pay a state visit to Estonia, our close friend and ally, and a proud nation that has fought hard for its freedom. It is my honour to be accompanied by a distinguished delegation of Czech business representatives during this visit.

Over the past years, Europe's security environment has undergone a profound transformation. Russia's aggression against Ukraine has fundamentally reshaped our understanding of security and resilience. More than ever, it is essential to strengthen NATO's Eastern Flank and enhance Europe's defence capabilities. To achieve this goal, we need active cooperation between our industries and must rely on their talent, expertise, and experience.

We are committed to further deepening and expanding economic cooperation between Estonia and Czechia. Estonia has a highly developed service sector and advanced e-government services, as well as a business-friendly environment for foreign investment. Moreover, it has an exceptionally strong and rapidly growing defence and cyber sector, internationally recognised as a global leader in cybersecurity and a hub for innovative defence technologies.

My visit to Estonia underlines Czechia's firm commitment to close cooperation with trusted allies and partners — not only at the political and military levels, but also through collaboration between our industries, innovators, and research institutions.

It is therefore my great honour to present leading Czech companies and institutions active in the fields of defence, security, cybersecurity, transport, and research. Strong partnerships between governments, industry, and research institutions will strengthen both our security and prosperity, which are closely interconnected.

I am confident that the Czech business mission to Estonia and the joint Estonian-Czech Business Forum will create new opportunities and foster strategic partnerships. I wish you all a productive and successful mission.

Milena Jabůrková

Vicepresident

Viceprezidentka

✉ mjaburkova@spcr.cz

Dear entrepreneurs, Ladies and Gentlemen,

It is a great honour and pleasure to accompany the President of the Czech Republic, HE Petr Pavel, on his official visit to Estonia as the leader of the trade delegation of the Confederation of Industry of the Czech Republic.

The relationship between the Czech Republic and Estonia is rooted in shared values and common historical experiences. Both nations have walked the path from totalitarianism to liberty, and today stand side by side as committed members of the European Union and the North Atlantic Alliance — partners united by a shared vision for a secure and prosperous Europe.

Estonia, world-renowned as a digital pioneer and home to one of the most innovative startup ecosystems in Europe, has long been an inspiring partner for Czech industry. Czech companies, in turn, bring deep industrial know-how and strong engineering tradition, opening growing opportunities for cooperation in advanced technologies and joint projects within the European single market.

In today's geopolitical reality, our cooperation extends far beyond trade. The war in Ukraine and persistent hybrid threats remind us that the security of Estonia is the security of Europe. Estonia's frontline experience, its leadership in cyber defence, and its hosting of the NATO CCDCOE and DIANA Regional Hub in Tallinn make it a strategic partner of the highest importance — particularly in defence, cybersecurity, and dual-use technologies, where Czech and Estonian companies can join forces to strengthen the entire Alliance.

This year's delegation reflects these strategic priorities. We are proud to present companies at the forefront of defence and security, leading manufacturers of transport and mobility technology, and representatives of Czech universities, whose research excellence forms the long-term foundation of our industrial competitiveness.

Given the excellent companies and institutions accompanying us, and the exceptional support from the President and his team, I firmly believe that members of our delegation will meet with great interest and positive responses from their Estonian counterparts.

Established in 1919, AERO Vodochody AEROSPACE a.s. (“AERO”) is the oldest continuously operating aerospace manufacturer in Europe. AERO is the largest aerospace company in the Czech Republic and an established participant in the European defence and aerospace industry. AERO’s core activities include the design, development, production, certification, testing, upgrade, and life-cycle support of military jet aircraft. The company is one of the few organizations worldwide with the capability to manage the complete development and production cycle of military jet trainer aircraft. To date, AERO has produced more than 11,000 aircraft, including approximately 6,700 jet trainers. The L-39 Albatros and L-159 ALCA platforms remain in service with multiple operators and continue to demonstrate reliability, cost-effectiveness, and operational suitability for a wide range of missions.

ITS is a traditional Czech company with 35 years of expertise in cybersecurity, software development, and enterprise infrastructure. Our solutions protect critical infrastructure and industrial (OT) environments and handle millions of B2B document exchanges worldwide every day. Operating internationally, our 2025 portfolio includes joint B2B cybersecurity projects in Finland and long-term service delivery for clients in Central Europe, the UK, Thailand, and Malaysia. To ensure operational continuity in manufacturing, we secure OT networks, segment industrial environments, and implement resilient, encrypted communications between remote production sites. Furthermore, as a commercial partner of the Quantum Innovation Center in the Czech Republic, we integrate Post-Quantum Cryptography (PQC) solutions with dedicated support. We actively seek B2B and B2G partnerships in secure connectivity, OT modernization, and the quantum-safe journey.

VAFO Group is a leading European manufacturer of premium pet food based in the Czech Republic. As a family-run company with more than 30 years of experience, VAFO produces high-quality pet food and is present in over 90 countries worldwide. Its portfolio includes dry and wet food, snacks, and supplements for dogs, cats, and small animals. Alongside its own popular brands (such as Brit and Carnilove), VAFO also operates as a private-label producer. The company places strong emphasis on sustainability and innovation, focusing on products that support pet wellbeing. VAFO operates nine production plants in Europe and has subsidiaries in the Czech Republic, Finland, Germany, Sweden, Poland, the United Kingdom, Estonia, Austria, and France.
