

FN NANO®

Highly efficient nanotechnology coatings to purify air and destroy viruses and bacteria

FN NANO® surface structure:

FN-NANO is an innovative Czech company focused on nanotechnology. Our main goal is to create a globally healthy and clean environment using our nanotechnologies and products based on the photocatalytic effect.

EXTERIORS:

Self-cleaning surface:

- Long-term protection against UV, dirt, mold, moss, algae
- Protection of wood against darkening, blackening
- Protection of monuments

6 years after construction

7 years after FN NANO® application

Reducing air pollution:

- improve air quality in large cities and industrial
- SMART CITIES start with clean air and our technology is a critical part of providing this environmental function.

INTERIORS:

Improving the quality of indoor air:

- Removing odors, allergens, VOCs, viruses and bacteria
- Lowering the transmission of airborne infectious diseases and reduced risk of asthma
- The most advanced way to clean the air in the presence of people (offices, hospitals, etc.)
