Czech technological company with a global reach and **top know-how in pool, drinking and waste water treatment**. The firm is experienced in **air disinfection** and **deodorization** and also **applications of nanoparticles**. It uses the photocatalysis process, ozone technology, UV, and AOP (Advanced Oxidation Process).

## AIR

### PRODUCT PORTFOLIO

TriUV® Disinfection units

- UV radiation is the only natural way of disinfecting air in the presence of people.

LifeOX-AIR® Ozone generators

- Perfect complex disinfection and deodorization of small and large spaces and areas.

Combi Ozone/UV (AOP)

- Forms OH-radicals and provides an Advanced Oxidation Process.

TriUV® Disinfection unit

LifeOX-AIR® Ultra + Destructor Ozone generator 2in1

## WATER

### PRODUCT PORTFOLIO

Medium Pressure UV Systems LIFEUVM®

- Prevent reactivation of bacteria and remove trichloramine.

Low Pressure UV Systems LIFEUVL®

- Effectively destroys bacteria, fungi, and viruses.

Ozone treatment

- The most advanced way to treat pool water.

AOP LifeOX® (Advanced Oxidation Process)

- The combination of ozone and UV radiation significantly increases the oxidation potential.

LifeUVM® ProfiPure  
The smallest medium pressure UV lamp

LifeOX® M.EP  
UVM + ozone (AOP)
